Copyright: **The copyright interests in this collection remain with the creator. For more information, call 619-255-0225.**
Acquisition Method: This collection was donated by Robert S. Scott in November 2003.

BIOGRAPHICAL/HISTORY NOTE

Carroll Dewilton Scott (1874-1970) was a naturalist, educator, and prolific writer of poetry, stories, reflections, and articles about the natural world. He was born in Texas in 1874 and graduated from Stanford University in 1902. Scott was deeply committed to sharing his appreciation for nature, particularly with children. He worked in the San Diego County public school system from 1914 to 1934, first as a teacher and later as Supervisor of Nature Study. Scott also served as the first Director of Education for the San Diego Natural History Museum from 1920-1921. During this time, he created a program to bring nature-study materials to local schools and initiated a popular series of museum-sponsored nature walks. For many years, Scott wrote weekly California Nature articles for the *San Diego Sun* and *San Diego Union* newspapers. His publications include *Manual of Nature Education for San Diego Elementary Schools* (1927), *Finding Real Fairies* (1945), *Looking for California Condors* (1945), *Story of Southern California Wildflowers* (1955), *Here's Don Coyote* (1956), and *California Nature Poems* (1957).

SCOPE AND CONTENT NOTE:

The Carroll Dewilton Scott Collection, ca. 1900-1964, consists primarily of nature writings of Scott, including diaries, poetry, children's stories and music, reflections, and descriptive prose. A smaller part of the collection includes articles, clippings, and illustrations collected by Scott.

Series I (approximately one-quarter of the collection) contains six volumes of nature diaries written by Scott from 1909 to 1949. The diaries are primarily manuscript. They record detailed personal observations of nature, including species lists and descriptive prose. The diaries also contain reflections on topics such as the future of humanity, historical information, and miscellaneous personal records on topics such as finances and progress on writing projects. A separate volume contains a cumulative typescript index prepared by the author. The series also includes manuscript and typescript lists of wildflowers in bloom and seeds collected at Scott's home in Pacific Beach, CA, from 1955 to 1957.

Approximately half of the collection (Series II) consists of various collections of poetry, children's stories and songs, reflections, and descriptive prose written by Scott. The documents are primarily typescript with manuscript notations by Scott. The collections were prepared, bound, and indexed by the author. This series also includes looseleaf typescript writings (e.g., "Summary of Mankind," 1945-1953), copies of publications that contain a poem or story written by Scott, lists covering topics such as Scott's literary output, and collections of source articles with notations by Scott.

Series III contains other materials collected by Scott, including miscellaneous nature articles, illustrations, and newspaper clippings. A letter of donation by his son, Robert S. (Bob) Scott, with autobiographical and biographical material, is included with this series.

CONTAINER LIST

Box Contents
