

San Quintin Kangaroo Rat Rediscovery | The Authors

Scott Tremor is a mammalogist at the San Diego Natural History Museum (The Nat). His expertise with mammals, especially rare rodents, spans both Southern California and the Baja California Peninsula. Tremor specializes in surveying for and identifying Southern California mammals to the subspecies level. He is also the principal editor and author of the [*San Diego County Mammal Atlas*](#), which was recently released in December 2017.

Sula Vanderplank is a research associate at the San Diego Natural History Museum (The Nat) and science advisor at Terra Peninsular. Sula is a field botanist who studies natural history, floristics, and conservation science, her research has focused on the botany and ecology of the Mediterranean-climate region of Baja California, Mexico. For the last thirteen years Sula has published broadly on the flora of this region including field guides, academic books chapters and more than 25 peer-reviewed papers. Sula also serves as an adjunct researcher at San Diego State University and the Center for Scientific Research and Higher Education of Ensenada (CICESE).

Eric Mellink is senior researcher at Center for Scientific Research and Higher Education of Ensenada, Baja California (CICESE). Eric's research interest is wildlife ecology, including its conservation status and the mid and long-term anthropogenic changes in landscapes. He has studies mostly rodents and terrestrial birds in arid and semiarid northern Mexico, and coastal and marine birds along Mexico's Pacific coast and islands. He has published more than 200 scientific papers, of which 125 are in peer-reviewed journals. He is currently on sabbatical at the Institute Universitaire de France, in Besançon.
