San Diego, CA 92112-1390 Email: jrebman@sdnhm.org

or to:

Dr. Michael G. Simpson, Department of Biology, San Diego State University,
San Diego, CA 92182-4614 Email: msimpson@mail.sdsu.edu

Cover photographs are plants endemic to San Diego County, California,
all taken by the authors.

Table of Contents

Preface	v
Alphabetical Listing of Families	xxi
San Diego County Vascular Plant Checklist: Documented with Herbarium Vouchers	
Lycophytes	1
Equisetophytes	1
Ophioglossoid Ferns	1
Leptosporangiate Ferns	1
Seed Plants	3
Conifers	3
Gnetales	4
Angiosperms (Flowering Plants)	4
Magnoliids: Laurales (Calycanthaceae & Lauraceae)	4
Magnoliids: Piperales (Saururaceae)	4
Ceratophyllales (Ceratophyllaceae)	4
Eudicots	4
Monocots	81
Appendix 1: Taxa Reported for San Diego County but Excluded	97
Appendix 2: Taxa Endemic to San Diego County	105
Appendix 3: Hybrid Taxa in San Diego County	109
Appendix 4: Historical Collections Not Documented in Last 50 Years	111
Appendix 5: Recent Collections Lacking SD or SDSU Vouchers	113
Appendix 6: Taxa with CNPS Inventory Listings	115
Index of Genera and Families	121
Notes: (for personal use)	131

Preface

GOALS AND FORMAT

This is the fifth edition of the *Checklist of the Vascular Plants of San Diego County* (here referred to as simply the *Checklist*), which catalogs all native and naturalized vascular plants known to occur in San Diego County, California, U.S.A., “naturalized” referring to non-native/exotic plants that grow, persist, and reproduce in natural, non-cultivated habitats. This edition supersedes the four previous editions of the *Checklist* (Simpson et al. 1995, 1996; Simpson and Rebman 2001, Rebman and Simpson 2006). The need for this revision of the *Checklist* arose with the publication of *The Jepson Manual: Vascular Plants of California, Ed. 2* (Baldwin et al. 2012, referred to hereafter as *Jepson II*, which replaced the earlier Hickman 1993 edition, *Jepson I*), resulting in numerous nomenclatural changes to the plants of California. In addition, a great number of taxa new to San Diego County have been discovered since our 2006 (fourth) edition, and some misidentifications have been corrected.

Nomenclature for this *Checklist* is based on *Jepson II* for most native and naturalized plants, *Hortus Third* (Bailey & Bailey 1976) for some naturalized plants, or original research journal articles where pertinent (discussed below or cited in the *Checklist*). We have also utilized the *Consortium of California Herbaria* (CCH 2014), the *Jepson eFlora* (Jepson Flora Project 2014) and published volumes of the *Flora of North America* (Flora of North America Editorial Committee, eds. 1993+), the latter listed electronically at <<http://www.efloras.org>> and referred to here as *FNA eFlora*.

As with the fourth edition, this fifth edition of the *Checklist* provides documentation of all taxa by the listing of an accession number from a representative herbarium specimen, known as the herbarium voucher. Almost all specimen citations are from the San Diego Natural History Museum (**SD**), which can be viewed as digital scans at the synoptic collection images link of the San Diego County Plant Atlas web site <<http://www.sdplantatlas.org>>. A few specimens are cited from the herbaria at University of California Davis (**AHUC**), California Academy of Sciences (**CAS**, **DS**), California Department of Food and Agriculture (**CDA**), Desert Botanical Garden (**DES**), Harvard University (**GH**), Humboldt State University (**HSC**), California Polytechnic State University San Luis Obispo (**OBI**), Rancho Santa Ana Botanic Garden (**RSA**, **POM**), San Diego State University (**SDSU**), San Jose State University (**SJSU**), University of California Berkeley (**UC**, **JEPS**), and University of California Riverside (**UCR**), and the Smithsonian Institution (**US**), and Utah State University (**UTC**). Most specimen records were accessed from the *Consortium of California Herbaria* (CCH 2014). Appendix 1 lists taxa that have been reported to occur in San Diego County but which are excluded from our *Checklist*, either because these reports lack documentation or because we believe the identity or locality was incorrect.

We feel that in preparing any floristic checklist, it is of the utmost importance that every taxon listed be documented with an herbarium specimen deposited and accessioned in an accredited herbarium. Without proper specimen documentation, the presence or correct identity of these taxa may be in doubt. Checklists of taxa without documentation are unverifiable and thus are out of the realm of science. We hope and encourage that future work on regional checklists and local floristic surveys, including those by governmental agencies and private consulting firms, will endeavor to provide complete specimen documentation.

DIVERSITY

Our current count of native and naturalized vascular plants *documented* to

occur in San Diego County is **2,447** species (including common hybrids), and **2,672** total taxa (including subspecies and varieties). These totals are up from our **2,143** species and **2,314** total taxa of the fourth edition, mostly due to new discoveries in the interim. These species and taxa occur in a total of **879 genera** in **163 families**.

Of these **2,447** species, **1,689 (69.0%)** are native to the County and **758 (31.0%)**, up from 26.6% in our fourth edition) are non-native and naturalized in the County (the latter designated with a “*” symbol). Of the **2,672** total taxa, **1,901 (71.1%)** are native and **771 (28.9%)**, up from 25.0% in our fourth edition) are non-native and naturalized. In summary, the documented County’s flora has increased by **304 species** (14.2%, 116 species native, 188 species non-native) and **358 total taxa** (15.4%, 166 taxa native, 192 taxa non-native) since our 4th edition was published.

These values illustrate the great number of native plants that have been discovered in the County in the last eight years. But, they also point out the great number of exotic plants that have become established in native habitats of the County (an increase in documentation of 7.4% of our total species and 6.9% of our total taxa since the publication of our 4th edition), with more being detected every year. This increase may be due in part to our accelerated effort to document plants of the County (see Plant Atlas Project, below). The increase may also represent recent introductions, often from cultivation but many “accidental” (Lehan et al. 2013).

San Diego County is often cited as having more species (or taxa) of vascular plants than any other county in the United States. We have to date not verified this from counts of county floras (few are available), but we know of no other county in the U.S., including the counties of the Hawaiian islands, having more species or total taxa. Perhaps a more meaningful comparison between regions is the richness of native (versus non-native) plants. Thus, the **1,689 native** vascular plant species or **1,901 native** total taxa for San Diego County could be used in regional comparisons of natural biodiversity. This does not detract from the importance of tabulating non-native, naturalized plants, most of which have become a permanent part of our flora.

NATIVE TO CALIFORNIA, NOT TO SAN DIEGO COUNTY

Of the taxa we list as non-native to San Diego County, 15 are native to the state of California, but are thought by us to have been established from other parts of the state to native habitats in San Diego County and are listed as non-native to the County. These taxa are:

<i>Baileya multiradiata</i> Torr.	Asteraceae
<i>Eriophyllum staechadifolium</i> Lag.	Asteraceae
<i>Eriogonum giganteum</i> S. Watson var. <i>formosum</i> K. Brandegee	Polygonaceae
<i>Eriogonum giganteum</i> S. Watson var. <i>giganteum</i>	Polygonaceae
<i>Galium tricornutum</i> Dandy	Rubiaceae
<i>Gilia tricolor</i> Benth.	Polemoniaceae
<i>Hesperexax caulescens</i> (Benth.) A. Gray	Asteraceae
<i>Leptosyne gigantea</i> Kellogg	Asteraceae
<i>Lipocarpa micrantha</i> (Vahl) G.C. Tucker	Cyperaceae
<i>Malva assurgentiflora</i> (Kellogg) M.F. Ray	Malvaceae
<i>Mentzelia lindleyi</i> Torr. & A. Gray	Loasaceae
<i>Oenothera suffrutescens</i> (Ser.) W.L. Wagner & Hoch	Onagraceae
<i>Prunus ilicifolia</i> (Hook. & Arn.) D. Dietr. subsp. <i>lyonii</i> (Eastw.) P.H. Raven	Rosaceae
<i>Ribes aureum</i> Pursh var. <i>aureum</i>	Grossulariaceae
<i>Ribes aureum</i> Pursh var. <i>gracillimum</i> (Coville & Britton) Jeps.	Grossulariaceae

ENDEMICS

Of the plants native to San Diego County, 54 taxa (2.5% of our native taxa) are **strict endemics** or **near-endemics** to the County (listed in Appendix 2). We define a strict endemic (designated with the “§§” symbol) as a taxon native nowhere else but San Diego County. A total of 26 taxa (17 species and 9 infraspecies) are strict endemics to our County. A near-endemic (designated with the “§” symbol) is defined as a taxon with a native occurrence almost entirely restricted to San Diego County, but with one to very few populations known just outside the County’s boundary. By our count, there are 28 near-endemics (18 species and 10 infraspecies) in San Diego County. This degree of endemism highlights the uniqueness of our County’s flora.

As might be expected, strict and near-endemic taxa are overwhelmingly listed as rare, threatened, or endangered in the California Rare Plant Ranks (CRPR), California Natural Diversity Database (CNDDDB), or State and Federal Listings (CNPS Inventory 2014; see below). For example, 48 of the 54 endemic taxa have a CRPR listing. Three strict endemics (*Chorizanthe orcuttiana*, *Monardella viminea*, and *Pogogyne abramsii*) and two near-endemics (*Arctostaphylos glandulosa* subsp. *crassifolia* and *Pogogyne nudiuscula*) are federally endangered (Appendix 2).

HYBRIDS

A total of 32 of our County taxa are relatively common hybrids (listed in Appendix 3). We choose to recognize hybrids in our *Checklist* because they are part of the diversity of life in our area and many of these are (infrequently) encountered in our natural areas. According to the *International Code of Nomenclature for Algae, Fungi, and Plants* (McNeill et al. 2012), hybrid taxa may be given a formal name different from either parent, with the “x” sign preceding the epithet; e.g., *Salvia xpalmeri* (A. Gray) Greene is the formal name for a hybrid between *S. apiana* and *S. clevelandii*. Other hybrid names are simply represented by the presumed cross between two parents, e.g., *Quercus agrifolia* x *Q. wislizenii*. Hybrid plants may or may not be reproductively sterile. They may represent recurring crosses between species or infraspecies; in this case, they arise periodically in different places and different times, generally when the parent populations are sympatric or along the interface between parent populations. Or, hybrids may have become persistent and stabilized, but have not become widespread to the point of “swamping out” the parental populations. Persistent hybrid populations could in some cases represent an incipient speciation event.

The recognition of hybrids is generally based on morphological intermediacy between well-established species or infraspecies. In some cases, hybrid crosses between putative parents have been done experimentally and these progeny compared with those that occur in the wild in order to verify the parental heritage. In other cases, genetic evidence is available that supports a hybrid origin and that identifies the parents. However, in the absence of such evidence, the recognition of hybrids is controversial and debatable.

Note that one species earlier thought to be of hybrid origin, *Cylindropuntia xfosbergii*, was changed to a taxon of non-hybrid origin, *Cylindropuntia fosbergii*, the rationale based on a recent molecular study; see Mayer et al. 2011. Hybrids between various taxa of *Brodiaea* (Themidaceae) have been observed in our County but are not currently documented (Wayne Armstrong, personal communication).

WAIIFS AND WEEDS

Some of the taxa listed in our *Checklist* may represent “waifs,” non-native

plants that have escaped from cultivation or been accidentally transported from other areas, but which have not become well established (possibly due to their inability to reproduce in our local habitats) and which may become, or already have become, extirpated in native regions. An example of a waif is *Crotalaria juncea* known from a single, 2012 collection (*K. Harper 1774*, SD 225699).

A precaution, however, is that some waifs could represent the incipient stage of establishment of plants that could spread in the future and become serious “weeds,” undesirable by competing with our native plants. For example, we have recent, single collections of *Osteospermum monstrosum*, Asteraceae (*N. Nenow 2349*, 15 Mar 2012, SD 234202) and *Pentameris airoides* subsp. *airoides*, Poaceae (*J. Rebman 26155*, 1 May 2013, SD 234203). Both of these taxa are extensively established weeds in Australia and could become so in our area without diligent efforts to eradicate them.

HISTORICAL COLLECTIONS NOT DOCUMENTED IN LAST 50 YEARS

Some taxa in our *Checklist*, native or non-native, are known only from one or a very few “historical” collections, made many decades ago. Appendix 4 lists 69 of these “historical” taxa that have not been collected in San Diego County in the last 50 years, i.e., having no known vouchers after 1 January 1964. The last year of collection of these historical vouchers ranges from 1875 to 1963 (mean 1923); in fact, of these 69 taxa, the majority (55%) were last collected before 1930. The total number of collections from San Diego County of these 69 taxa ranges from 1 to 16, with a mean of 2.5; the majority of the 69 taxa (52%) are vouchered for San Diego County with only a single collection. Of these 69 historical taxa, 51 have vouchers only from herbaria other than SD or SDSU.

Given that specimens of these “historical” taxa have not been re-collected in the County in a very long time (particularly given the efforts of the San Diego County Plant Atlas Project; see below), they are either very rare or have possibly become extirpated in the County. It is also possible that some were originally misidentified, incorrectly labeled, or mistakenly interpreted with regard to locality, some of these transferred to Appendix 1. We will continue to investigate or attempt to rediscover these plant taxa. However, in the absence of contradictory data, we still consider them part of our biodiversity.

RECENT COLLECTIONS LACKING SD OR SDSU VOUCHERS

We list in Appendix 5 a total of 38 taxa collected more recently (within the last 50 years), but for which we have no vouchers at either SD or SDSU. These taxa may also be relatively rare in our County or could possibly represent mis-labeled or mis-identified specimens. We aim to check all of these in the coming years.

TAXA WITH CNPS INVENTORY LISTINGS

We list in Appendix 6 all taxa in San Diego County with listings recorded in the *California Native Plant Society's Inventory of Rare and Endangered Plants* (CNPS 2014). (See ENVIRONMENTAL LISTING, below, for an explanation of categories.) We also list, at the end, an additional five taxa for which CNPS inventory listing is pending or is established for infrataxa not recognized in our *Checklist* or *Jepson II*. A total of 266 taxa that occur in San Diego County (10.0% of our total taxa; 14.0% of our total native taxa) are listed in the *CNPS Inventory*. Of these, 12 taxa are Federal Endangered (5 additional taxa are Federal Threatened, and 1 additional is a Federal Species of Concern) and 22 taxa are California Endangered (1 additional taxon is California Threatened and 7 additional are California Rare). A total of 53 taxa in our flora have a CNPS Rare Plant/Threat Rank of 1B.1.

SAN DIEGO COUNTY PLANT ATLAS PROJECT

One of us (Dr. Jon Rebman) has been intimately involved in a concerted effort to better document plant taxa throughout the County using “parabotanists,” largely volunteer botanists and amateurs who are trained to collect and document plants. This effort has led, in 10 years, to the addition of over 62,000 new specimens to the herbarium at the San Diego Natural History Museum (**SD**). Since the inception of the Plant Atlas project, we have documented (at the time of publication of this *Checklist*) an estimated **483** new records (total taxa, including infraspecies) in the County, **198** native and **285** non-native plants. We continue to explore regions of the County that historically have been under-collected.

The excellent documentation of new collections from the Plant Atlas project has enabled us to map and analyze the vascular plant diversity of the County in ways that were previously impossible. Digital scans of the voucher specimens of the San Diego County synoptic collection at **SD** are now complete, and we now have the capability of generating checklists, maps, and new additions of taxa within areas of interest. The San Diego County Plant Atlas project will continue to document the flora of our region, and we encourage others to become involved. Please see <http://www.sdplantatlas.org> for more information and online resources.

CLASSIFICATION

The **Land Plants** (also known as Embryophytes or Embryophyta) are a group of organisms that have adaptations for surviving on land and that most people equate with the term “plant.” Land Plants are made up of three, relatively small groups – the Liverworts, Hornworts, and Mosses – that lack specialized conductive tissue, plus a very large group that has conductive tissue (xylem and phloem), the **Vascular Plants** or Tracheophytes (see Figure 1). The basal, “non-vascular” Liverworts, Hornworts, and Mosses (often collectively termed “bryophytes”) are not treated in this *Checklist* because collections of these taxa remain scanty and identification of these groups requires special expertise. However, we do wish to point out the great need to document these missing elements of our flora and to ultimately expand this *Checklist* to include all Land Plants.

This *Checklist* of the native and naturalized Vascular Plants occurring in San Diego County arranges species alphabetically by plant family within major vascular plant groups. The major vascular plant groups that we recognize (see Simpson 2010) are: **Lycophytes** (=Lycopods), **Equisetophytes** (Equisetales, =Sphenopsids), **Ophioglossoid Ferns** (Ophioglossales), **Leptosporangiate Ferns** (Polypodiales), **Conifers** (including the **Gnetales**), and **Angiosperms** (Flowering Plants). These groups are now in line with those recognized in *Jepson II*. Figure 1 shows a simplified cladogram of these major vascular plant groups.

The **Seed Plants** (Spermatophytes) are a major component of the Land Plants, among which only members of the **Conifers**, **Gnetales**, and **Angiosperms** (Flowering Plants) are native or naturalized in San Diego County (Figure 1). Although many recent studies support the Gnetales (including species of *Ephedra* in our flora) to be nested within the Conifers, we list them as a separate group in the *Checklist*.

Within the Angiosperms, we and *Jepson II* mostly adhere to the Angiosperm Phylogeny Group III (2009) system of classification in denoting major groups and most families (see below). This system, commonly abbreviated *APG III*, superseded the earlier APG (1998) and APG II (2003) systems. The *APG III* system is based primarily on molecular (mostly DNA sequence) data and the strict recognition of “monophyletic” groupings (those consisting of a common ancestor and *all* descendents). The native or naturalized Flowering Plants in

Figure 1. Simplified cladogram of the Land Plants (Embryophytes). The basal liverworts, hornworts, and mosses (non-vascular Land Plants) are not listed in the *Checklist*. Note the relationships of the major groups of Vascular Plants (Tracheophytes) treated in this *Checklist*. Groups in bold contain species native or naturalized in San Diego County. (Modified from Simpson 2010.)

San Diego County occur in four major taxonomic groups in the APG III system: **Magnoliids** (including the Calycanthaceae and Lauraceae of the order Laurales, and the Saururaceae of the order Piperales), **Ceratophyllales** (Ceratophyllaceae), **Monocots**, and **Eudicots** (Figure 2). The traditional “Dicots” (dispersed among all the asterisked groups portrayed in Figure 2) are known with confidence to comprise an unnatural grouping, which have been formally abandoned. However, of the San Diego County species that have traditionally been treated as “Dicots”, almost all belong to a well defined, monophyletic group called the **Eudicots**. Thus, the Flowering Plants that occur in San Diego County are either **Eudicots**, **Monocots**, or one of five species in the families Calycanthaceae, Lauraceae, and Saururaceae of the **Magnoliids** and Ceratophyllaceae of the **Ceratophyllales**. These last four families are placed at the beginning of our list of Angiosperms, to denote their basal evolutionary position and their distinction from the Eudicots and Monocots.

Although the classification of flowering plant families of our *Checklist* largely follows *Jepson II* (which, as stated earlier, largely conforms to *APG III*), we cite some differences based on recent phylogenetic studies. Additional changes, such as the splitting of the Boraginaceae into segregate families, might be warranted in the future. An excellent resource for up-to-date information on angiosperm classification and relationships is the Angiosperm Phylogeny Website (Stevens 2001+). The following summarizes changes made in family, generic, or species treatments of the current *Checklist* as compared with our previous (4th) edition.

Angiosperms - Flowering Plants

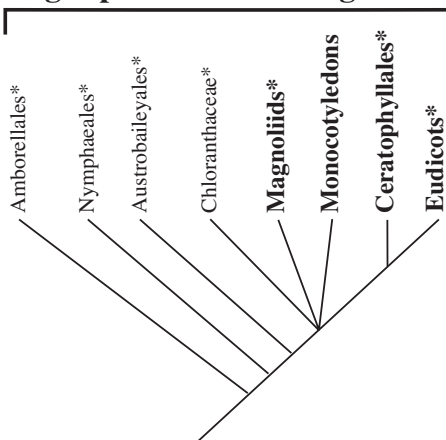

Figure 2. Simplified cladogram of the Angiosperms, after Angiosperm Phylogeny Group III (2009), showing relationships of the major groups. Groups containing taxa listed in this *Checklist* are in bold. The traditional “Dicots” (including all taxa with an asterisk) are an unnatural (paraphyletic) group and therefore abandoned. (Modified from Simpson 2010.)

CHANGES IN FAMILY, GENERA, AND SPECIES NAMES

The publication of *Jepson II* in 2012 brought numerous nomenclatural changes, largely derived from molecular phylogenetic analyses and the goal of making all of our taxa monophyletic. These studies have necessitated either the splitting or the lumping of several families and genera. Many of the generic nomenclature changes (for example, *Acmispon* and *Hosackia*, segregated from *Lotus* of the Fabaceae) were actually done some time in the past, and constitute resurrected taxa. The “old-timer” taxonomists were often right!

A few taxonomic changes in our *Checklist* (e.g., the transfers of all *Chamaesyce* taxa to *Euphorbia*) reference recent revisions to the *Jepson eFlora* that were made subsequent to *Jepson II*. Others (e.g., the splitting of *Cryptantha* into five genera) arise from recent research articles not yet incorporated into the *Jepson eFlora*. Still others reflect treatments in *FNA* (1993+). Although we expect even more nomenclatural changes in the future, plant names have begun to stabilize. However, these changes require all of us to re-learn many scientific names, even some of common, well-known taxa. The following is a summary of the major nomenclatural changes in our fifth edition, organized by group and family.

LEPTOSPORANGIATE FERNS

Pteridaceae. All of our taxa of *Cheilanthes* have been transferred to the genus *Myriopteris*, as based on the phylogenetic studies of Grusz and Windham (2013).

CONIFERS

Cupressaceae. Our two *Cupressus* species are now treated in the genus *Hesperocyparis*.

EUDICOTS

Acanthaceae. *Avicennia* has been transferred from the Verbenaceae to this family.

Aceraceae. We now treat the genus *Acer* as part of the Sapindaceae.

Amaranthaceae. This family is now split from the Chenopodiaceae, as was traditionally done.

Anacardiaceae. We are recognizing *Rhus aromatica* var. *simplicifolia* and var. *aromatica*, these not recognized in *Jepson II*.

Apiaceae. Two species of *Spermolepis* found in San Diego County have been recently described (Nesom 2012).

Apocynaceae. Taxa of the genera *Cynanchum* and *Sarcostemma* have been transferred to the genus *Funastrum*.

Araliaceae. The genus *Hydrocotyle* has been transferred from the Apiaceae to the Araliaceae.

Asteraceae. *Chrysanthemum carinatum* has been changed to *Ismelia carinata*. *Chrysanthemum coronarium* and *C. segetum* have been transferred to the genus *Glebionis*. All of our *Chrysothamnus* species have been transferred to the genus *Ericameria*. We choose to recognize varieties of *Corethrogyne filaginifolia* despite the fact that they are no longer recognized in *Jepson II*. Species of the genus *Conyza* have been transferred to the genera *Erigeron* or *Laennecia*. Our species of *Coreopsis* (except for *C. tinctoria*) have been transferred to the genus *Leptosyne*. *Dyssodia tenuiloba* is now *Thymophylla t.* Our species of *Filago* have been transferred to the genus *Logfia*. Our *Machaeranthera* taxa have been transferred to the genera *Dieteria* or *Xanthisma*. *Matricaria matricarioides* is now *M. discoidea*. *Picris echioides* is now *Helminthotheca echioides*.

Boraginaceae. This family has been expanded significantly and is now inclusive of the former families Boraginaceae s.s., Ehretiaceae, Heliotropaceae, Hydrophyllaceae, and Lennoaceae. However, this lumping is controversial and may be reversed in the future. The genus *Cryptantha* has been split into five genera: *Cryptantha* s.s., *Eremocarya*, *Greeneocharis*, *Johnstonella*, and *Oreocarya* (see Hasenstab-Lehman and Simpson 2012). Based on recent evidence (Simpson et al., 2014), *Eremocarya* is treated as two species (*E. lepida* and *E. micrantha*), formerly treated as varieties of *Cryptantha micrantha*. A possible new variety of *Cryptantha pterocarya* and cryptic forms of *Cryptantha intermedia* await description. A new species of *Pectocarya*, *P. anisocarpa* (not in *Jepson II* or yet in the *Jepson eFlora*) has been described (Guilliams et al. 2013) and is included here. *Turricula parryi* is now *Eriodictyon parryi*.

Brassicaceae. *Arabis glabra* has been transferred to the genus *Turritis*. *Guillenia lasiophylla* is now *Caulanthus lasiophyllus*. *Hutchinsia procumbens* is now *Hornungia procumbens*. Our species of *Cardaria* and *Coronopus* have been transferred to the genus *Lepidium*. We choose to recognize *Lepidium virginicum* var. *robinsonii*, a taxon not accepted by *Jepson II*. *Rorippa nasturtium-aquaticum* is now *Nasturtium officinale*. *Sibara virginica* is now *Planodes virginicum*.

Cannabaceae. This family in our County now includes both *Cannabis* and *Celtis*, the latter formerly classified in the Celtidaceae or Ulmaceae.

Caryophyllaceae. The native *Silene multinervia* has been shown to be clearly distinct from the non-native *S. coniflora* (Rautenberg et al. 2012).

Chenopodiaceae. This family is now split from the Amaranthaceae. Within the Chenopodiaceae, *Atriplex californica* is now *Extriplex californica* (Zacharias and Baldwin 2010), a change made in the updated *Jepson eFlora*. *Sarcocornia pacifica* is back to *Salicornia pacifica*.

Cistaceae. Our taxa of *Helianthemum* have been transferred to the genus *Crocianthemum* (Sorrie 2011), a change made in the updated *Jepson eFlora*.

Cleomaceae. Our taxa of the Capparaceae have been transferred to this family. Within the Cleomaceae our *Isomeris* taxa have been transferred to the genus *Peritoma*. *Cleome hassleriana* is now *Tarenaya hassleriana*.

Euphorbiaceae. All taxa of *Chamaesyce* are now treated in the genus *Euphorbia*, a change to be recognized in the updated *Jepson eFlora*.

Fabaceae. *Acacia farnesiana* is now *Vachellia farnesiana*. *Acacia greggii* is now *Senegalia greggii*. *Caesalpinia virgata* is now *Hoffmannseggia microphylla*. *Cercidium floridum* is now *Parkinsonia florida*. The genus *Lotus* has been split into three genera: *Acmispon*, with gland-like stipules, *Hosackia*, with leaf-like stipules, and non-native species of *Lotus*, with gland-like stipules but often with the lower leaflets stipular in position. Most of these generic transfers resulted in retention of specific and infraspecific epithets, but the few that did not are worth mentioning here (authors of some indicated to avoid confusion). The former *Lotus hamatus* is now *Acmispon micranthus* (Torr. & A. Gray) Brouillet; *Lotus humistratus* is now *Acmispon brachycarpus*; *Lotus micranthus* Benth. is now *Acmispon parviflorus* [not to be confused with *A. micranthus* (Torr. & A. Gray) Brouillet, above!]; *Lotus nuttallianus* is now *Acmispon prostratus*; *Lotus purshianus* var. *p.* is now *Acmispon americanus* var. *a.*; *Lotus salsuginosus* var. *brevivexillus* and var. *salsuginosus* are now *Acmispon maritimus* var. *brevivexillus* and var. *maritimus*; and *Lotus scoparius* var. *brevialatus* and var. *scoparius* are now *Acmispon glaber* vars. *brevialatus* and *glaber*.

Gentianaceae. *Swertia parryi* has been transferred to the resurrected genus *Fraseria*, and two of our species of *Centaurium* to the genus *Zeltnera*.

Gratiolaceae. *Bacopa monnieri* of our flora has been transferred from the Plantaginaceae to this family (Rahmanzadeh et al. 2005). This change was recognized by neither *APG III* nor *Jepson II*, nor to date by *Jepson eFlora*.

Krameriaceae. The well known desert species, *Krameria grayi* is now *Krameria bicolor*.

Lamiaceae. *Hyptis emoryi* is now *Condea emoryi* (Pastore et al. 2011), a change recognized in the updated *Jepson eFlora*. *Salazaria mexicana* is now *Scutellaria mexicana*. *Satureja chandleri* is now *Clinopodium chandleri*.

Linderniaceae. *Lindernia dubia* of our flora has been transferred from the Plantaginaceae to this family (Rahmanzadeh et al. 2005). This change was recognized by neither *APG III* nor *Jepson II*, nor to date by *Jepson eFlora*.

Malvaceae. Species of *Lavatera* have been transferred to the genus *Malva*.

Montiaceae. This family, now segregated from the Portulacaceae, includes the genera *Calandrinia*, *Calyptridium*, *Cistanthe*, *Claytonia*, *Lewisia*, and *Montia*. *Calandrinia ambigua* and *Calandrinia maritima* are now recognized as species of *Cistanthe*. *Calandrinia ciliata* is now recognized as *C. menziesii*, the former misapplied to our County plants (this change not yet recognized in *Jepson II* or the *Jepson eFlora*; see Hershkovitz 2006). *Calyptridium arizonicum* is segregated from *C. parryi* vars. (not recognized in *Jepson II* or the *Jepson eFlora*; see Simpson et al. 2010).

Myrsinaceae. The genus *Anagallis* has been transferred from the Primulaceae to this closely related family, and *Centunculus minimus* is now *Anagallis minima*.

Onagraceae. The genus *Camissonia* has been split into six genera (with retention of specific and infraspecific epithets): *Camissonia*, *Camissoniopsis*, *Chylismia*, *Eremothera*, *Eulobus* (containing only *E. californicus* in our County), and *Tetrapteron*. The former taxon *Epilobium angustifolium* subsp. *circumvagum* is now *Chamerion a.* subsp. *circumvagum*. Finally, all the species of *Gaura* have been transferred to the genus *Oenothera*.

Orobanchaceae. *Boschniakia strobilacea* is now *Kopsiopsis strobilacea*. *Cordylanthus maritimus* subsp. *maritimus* is now *Chloropyron maritimum* subsp. *maritimum*. *Cordylanthus orcuttianus* is now *Dicranostegia orcuttiana*.

Papaveraceae. *Dicentra chrysantha* is now *Ehrendorferia chrysantha*, and *Stylomecon heterophylla* is now *Papaver heterophyllum*.

Phrymaceae. *Mimulus* has been split into several segregate genera, based on molecular phylogenetic studies (Barker et al. 2012), a change not in *Jepson II* and not yet updated in the *Jepson eFlora*. In our County, all *Mimulus* species have been transferred to the genera *Diplacus*, *Erythranthe*, or the monotypic *Mimetanthe*.

Plantaginaceae. The genus *Bacopa* has been transferred to the family Gratiolaceae (Rahmanzadeh et al. 2005). *Limosella acaulis* has been transferred to the family Scrophulariaceae. *Linaria canadensis* is now *Nuttallanthus texanus*. *Lindernia* has been transferred to the family Linderniaceae (Rahmanzadeh et al. 2005). (Note that some treatments, e.g., *FNA eFlora*, split our species of the genus *Antirrhinum* into two genera, *Sairocarpus* and *Neogaerrhinum*; we list these as synonyms in the *Checklist* for now.)

Polygalaceae. *Polygala cornuta* var. *fishiae* is now *Rhinotropis cornuta* var. *fishiae* (Abbott 2011), a change not in *Jepson II* and not yet updated in the *Jepson eFlora*.

Polygonaceae. *Polygonum convolvulus* is now *Fallopia convolvulus*. Several species formerly in the genus *Polygonum* are transferred to *Persicaria*. *Polygonum arenastrum* is now *P. aviculare* subsp. *depressum*. *Polygonum douglasii* subsp. *johNSTonii* is now *P. sawatchense* subsp. *sawatchense*. *Rumex salicifolius* var. *denticulatus* is now *R. californicus*.

Portulacaceae. This family now contains only species of the genus *Portulaca* in our flora.

Primulaceae. *Dodecatheon* taxa have been transferred to the genus *Primula*, a change not in *Jepson II* but recognized in the updated *Jepson eFlora*. Thus, in our County *Dodecatheon clevelandii* subsp. *clevelandii* is now *Primula clevelandii* subsp. *clevelandii*. As mentioned earlier, *Centunculus* taxa are now treated in the genus *Anagallis*, and the latter genus is now transferred to the family Myrsinaceae. The genus *Samolus* is transferred to the family Theophrastaceae.

Rhamnaceae. The common *Ceanothus greggii* var. *perplexans* is now *C. perplexans*. *Ceanothus greggii* var. *vestitus* is now *C. pauciflorus* [*C. vestitus* in *Jepson II*]; see Burge and Zhukovsky 2013. A presumed new, undescribed species of *Ceanothus* occurs in the Santa Margarita Mountains, of northwestern San Diego Co. What was called *Ceanothus foliosus* in our County has been resurrected to *C. austro-montanus*.

Rosaceae. The two varieties of *Potentilla glandulosa* have been transferred to *Drymocallis glandulosa*. *Sanguisorba occidentalis* has been changed to *Poteridium annuum* and *Sanguisorba minor* subsp. *muricata* is now *Poterium sanguisorba*.

Salicaceae. *Populus balsamifera* subsp. *trichocarpa* is now *Populus trichocarpa*. *Salix lucida* subsp. *lasiandra* is now *Salix lasiandra*.

Sapindaceae. *Acer* has been transferred to this family.

Saxifragaceae. *Saxifraga californica* is now treated as *Micranthes californica*.

Scrophulariaceae. *Limosella acaulis* has been transferred from the Plantaginaceae to this family. We have added a number of *Myoporum* taxa not listed in *Jepson II* or the *Jepson eFlora* but that we feel are naturalized in San Diego County.

Solanaceae. A new, undescribed species of *Physalis* has been discovered in San Diego County. Our two, non-native species of *Lycopersicon* have been transferred to the genus *Solanum* (Peralta and Spooner 2000), a change not listed in *Jepson II* nor yet in the *Jepson eFlora*.

Theophrastaceae. *Samolus* is now transferred from the Primulaceae to this closely related family.

Viscaceae. *Phoradendron serotinum* and subspecies have been transferred to *Phoradendron leucarpum*, a change to be noted in the *Jepson eFlora*.

MONOCOTS

We have placed the monocots at the end of our *Checklist* to parallel *Jepson II*. Within the monocots, the following major nomenclatural changes are noted:

Agavaceae. This family now includes our two species of *Chlorogalum* (previously classified in the Hyacinthaceae).

Convallariaceae. This family is no longer recognized in *APG III* and is not recognized in *Jepson II*. In the latter and in our *Checklist*, the genus *Maianthemum* is now transferred to the Ruscaceae.

Hyacinthaceae. This family is no longer recognized in *APG III* and is not recognized in *Jepson II*. In the latter and in our *Checklist*, the genus *Chlorogalum* is now transferred to the Agavaceae.

Juncaginaceae. *Lilaea scilloides* has been transferred to the genus *Triglochin*.

Melanthiaceae. Species of *Zigadenus* have been transferred to the genus *Toxicoscordion*.

Nolinaceae. *Nolina* species are now treated in the family Ruscaceae.

Poaceae. As in *Jepson II*, the species of *Achnatherum*, *Nassella*, *Oryzopsis*, and *Piptatherum* have been transferred back to the genus *Stipa*, although an upcoming phylogenetic treatment may split this genus even more. We are elevating the two subspecies of *Bromus madritensis* to species status, based on research by Fortune et al. (2008). *Elymus hispidus* and *E. ponticus* have been transferred to the genus *Thinopyrum* (as *T. intermedium* and *T. ponticum*; see FNA 1993+). *Festuca* now includes species of the genera *Lolium* and *Vulpia*. *Monanthochloe littoralis* has been transferred to the genus *Distichlis*. Our two infraspecies of *Leptochloa* have been transferred to the genus *Diplachne* (Peterson et al. 2012). Species of the genera *Leymus* and *Taeniatherum* have been transferred to the genus *Elymus*. Our three species of *Pennisetum* have been transferred to *Cenchrus* (Chemisquy et al. 2010).

Potamogetonaceae. *Ruppia maritima* has been transferred to Ruppiaceae.

Ruppiaceae. This family, containing only *Ruppia maritima* in our County, is now recognized, segregated from the Potamogetonaceae.

Ruscaceae. This family is now treated with a broadened circumscription, containing *Mainthemum* and *Nolina* in San Diego County and in California.

FORMAT OF CHECKLIST (see inside front cover for examples)

The following formatting is used in our *Checklist*:

- 1) Major vascular plant groups are noted in **BOLD CAPITALS**.
- 2) Families are noted in **BOLD SMALL CAPS**.
- 3) Species and infraspecies are noted in ***Bold italics*** (subsp.=subspecies, var.=variety); full authorships for these taxa are listed generally from *Jepson II* or *Hortus Third* (Bailey and Bailey 1976).
- 4) A representative herbarium voucher is shown in curly brackets "{ }", listing the herbarium acronym – from **AHUC, CAS, CDA, DS, DES, GH, HSC, JEPS, OBI, POM, RSA, SD, SDSU, SJSU, UC, UCR, US, or UTC**. (see page v for acronym meanings) – and associated accession number.
- 5) Common names are noted in **SMALL CAPITALS**, and are derived from *A Flora of San Diego County*, *Hortus Third*, *Jepson II*, from internet resources (especially Jepson Interchange Common Names Index, CalFlora <<http://www.calflora.org>>, and USDA Plants Database <<http://plants.usda.gov>>), or are created by us.

- 6) Environmental listing, where applicable, is noted in **bold** (see below).
- 7) Synonyms (rejected names) are listed within square brackets “[]”. We list only those synonyms that are the rejected names of *Jepson II* or other recent publications or citations. (See *Jepson II* or the *Jepson eFlora* for a more complete list of synonymy.)
- 8) Pertinent notes regarding literature cited, taxonomy, distribution, rarity, or ongoing studies are indicated for selected taxa.

The following symbols may precede taxa names to indicate:

- * a taxon that is not native to the County, but has become naturalized, meaning that the taxon is persisting or spreading in natural, non-cultivated areas.
- † a taxon that is not listed in *Jepson II*. Note that some of these may be cited anecdotally in *Jepson II*, but are not officially recognized there.
- §§ a taxon (these cited separately in Appendix 2) that is strictly endemic to San Diego County, known only to occur nowhere else.
- § a taxon (these cited separately in Appendix 2) that is considered to be a near-endemic to the County, having one or a very few vouchers occurring just outside of the County’s border.
- ? a taxon (cited only in Appendix 1) that is doubtfully found in the County and has certainly or probably been misidentified in the past.

An **Alphabetical Listing of Families**, citing page numbers, immediately follows this Preface.

The **San Diego County Vascular Plant Checklist: Documented with Herbarium Vouchers** contains only those taxa for which herbarium specimen vouchers (listed in curly brackets “{ }”) are known. This section is considered to be the definitive listing of taxa for the County (see below). Headings cite the family and genus at the start and end of each page.

Appendix 1: Taxa Reported for San Diego County but Excluded lists taxa that have been cited from various sources, but which we have omitted from the list. Some of these reports are mistaken identifications from past treatments or anecdotal checklists; known misidentifications are indicated in this list with “?”. Others may well occur in our County, but have no known documentation with an herbarium specimen. Some may have occurred in the County in the past but are now extinct and without a voucher. Finally, some reports may have been correctly identified and documented with a voucher specimen, but have a suspect, presumed incorrect, recorded locality. Several specimens collected by Orcutt in 1917 from “Mountain Springs Grade” (*Calochortus venustus*, *Cynoglossum grande*, *Greeneocharis similis*, *Salvia dorrii* var. *pilosa*, and *Mentzelia laevicaulis*), fit this last category; see Appendix 1. We will continue to clarify reported but undocumented or otherwise doubtfully occurring taxa in future research.

Appendix 2: Taxa Endemic to San Diego County re-lists taxa that are known to occur only in the County (**Strict Endemic**, §§ symbol) or that have one or a very few vouchers generally just outside the County’s boundaries (**Near-Endemic**, § symbol).

Appendix 3: Hybrid Taxa in San Diego County re-lists taxa that are of known or suspected hybrid origin.

Appendix 4: Historical Collections Not Documented In Last 50 years lists taxa for which we have no known vouchers after 1 January 1964.

Appendix 5: Recent Collections Lacking SD or SDSU Vouchers lists taxa collected after 1 January 1964 but for which we lack either an SD or SDSU voucher.

Appendix 6: Taxa with CNPS Inventory Listings cites all San Diego County vascular plants with listings on the California Native Plant Society's Inventory of Rare and Endangered Plants (CNPS 2014).

Index of Genera and Families at the back of the *Checklist* may be used to quickly locate a taxon listing. These include family and generic synonyms.

Notes at the end of the *Checklist* may be used for personal recording of data.

ENVIRONMENTAL LISTING

Environmental listing information is based on *California Native Plant Society (CNPS) Inventory of Rare and Endangered Plants of California* (CNPS 2014), referred to here as the *CNPS Inventory*. The *CNPS Inventory* lists California Rare Plant Ranks (CRPR), as well as those from the California Natural Diversity Database (CNDDB) and State and Federal Listings. In cases where the *CNPS Inventory* cites a taxon not recognized in *Jepson II*, the *CNPS Inventory* name is treated here as a synonym, with environmental listing for that synonym included. See the inside back cover for a definition of ranks listed in the *CNPS Inventory*.

FIELD AND WEB GUIDES

Recommended color-picture books to many of the local plants of San Diego County include: Lightner (2011), Rebman and Roberts (2012), and Allen and Roberts (2013). Useful web resources with color images include: San Diego County Plant Atlas web site <<http://www.sdplantatlas.org>> (also with links to scanned images of the SD San Diego County synoptic herbarium collection) and Calphotos <<http://calphotos.berkeley.edu>>. Additional resources are listed at the web site for the Botany Department of the San Diego Natural History Museum <<http://www.sdnhm.org/science/botany/resources>>.

ACKNOWLEDGEMENTS

We thank Duffie Clemons (posthumously) and Jerilyn Hirshberg for noting or discovering numerous additions to our County's flora in the Cuyamaca and Laguna Mountains (see Hirshberg and Clemons 1996). We thank Robert Lauri for discovering several new County records in the Palomar Mountains (Lauri 2004). We thank Craig Reiser (posthumously) for past documentation of several additions to the County. We thank Steve Boyd and Andy Sanders for providing documentation of some species in the herbaria at Rancho Santa Ana Botanic Garden (**RSA, POM**) and University of California Riverside (**UCR**), respectively. We thank Tom Chester and Kate Harper for discovering several new County records. We thank Fred Roberts for several taxonomic suggestions regarding our flora. We especially thank Tom Chester for numerous editorial comments and astute taxonomic sleuthing for this edition. We thank Daniel Simon for researching *FNA* volumes for nomenclatural changes in our County records and MaryAnn Brooks-Gonyer for supplying missing common names of many documented plants. We thank Mare Nazare of the Rancho Santa Ana Botanic Garden Herbarium (**RSA, POM**) for checking some voucher specimens deposited there. We thank Phil Unitt for allowing us to use the map of San Diego County vegetation on the cover (this based on those compiled by the U.S. Forest Service, Anza-Borrego Desert State Park, and the San Diego Association of Governments). We thank Layla Aerne-Hains, Mary Ann Hawke, Marty Jacobson, Karen Rich, John Sanborn, and numerous volunteers at the San Diego Natural History Museum Herbarium (**SD**) for their help in processing and recording vouchers. We especially thank Judy Gibson and Jeannie Gregory for their meticulous editing and research on this *Checklist*. We thank all of the parobotanists of the Plant Atlas Project who have contributed

their time and efforts in collecting plant specimens throughout San Diego County. Finally, we thank Scott McMillan, Brenda McMillan (formerly Brenda Stone), and Judy Gibson for their contributions to earlier editions of this *Checklist*.

UPDATES

We would appreciate and encourage notification of any vouchered additions or corrections to this *Checklist*, particularly knowledge of voucher specimens or field localities of taxa for which we lack documentation (in Appendix 1). Please relay such information to Dr. Jon Rebman, San Diego Natural History Museum, P.O. Box 121390, San Diego, CA 92112-1390 (SD Herbarium: 619-255-0229; email: jrebman@sdnhm.org) or to Dr. Michael Simpson, Dept. of Biology, San Diego State University, San Diego, CA 92182-4614 (SDSU Herbarium: 619-594-4479; email: msimpson@mail.sdsu.edu).

NOTE: Online access, including additions, corrections, and other listings of the *Checklist*, will be available in the future from the web page: <http://www.sdnhm.org/science/botany/projects/checklist> and via the San Diego County Plant Atlas web page: <http://www.sdplantatlas.org>.

Alphabetical Listing of Families

ACANTHACEAE – Acanthus Family [incl. Avicenniaceae]	4
ADOXACEAE – Adoxa Family	4
AGAVACEAE – Agave Family	81
AIZOACEAE – Fig-Marigold Family	4
ALISMATACEAE – Water-Plantain Family	81
ALLIACEAE – Onion Family	81
AMARANTHACEAE – Amaranth Family	5
AMARYLLIDACEAE – Amaryllis Family	81
ANACARDIACEAE – Sumac or Cashew Family	5
APIACEAE (UMBELLIFERAE) – Carrot Family	6
APOCYNACEAE – Dogbane Family [incl. Asclepiadaceae]	7
APODANTHACEAE – Apodanthes Family	8
APONOGETONACEAE – Cape-Pondweed Family	82
ARACEAE – Arum/Duckweed Family [incl. Lemnaceae]	82
ARALIACEAE – Ginseng Family	8
ARECACEAE (PALMAE) – Palm Family	82
ASPARAGACEAE – Asparagus Family	82
ASPHODELACEAE – Asphodel Family	82
ASPLENIACEAE – Spleenwort Family	1
ASTERACEAE (COMPOSITAE) – Sunflower Family	8
AZOLLACEAE – Mosquito Fern Family	1
BATACEAE – Saltwort Family	21
BERBERIDACEAE – Barberry Family	21
BETULACEAE – Birch Family	21
BIGNONIACEAE – Bignonia Family	21
BLECHNACEAE – Deer Fern Family	1
BORAGINACEAE – Borage Family	21
BRASSICACEAE (CRUCIFERAE) – Mustard Family	26
BURSERACEAE – Torchwood Family	29
CACTACEAE – Cactus Family	29
CALYCANTHACEAE – Sweet Shrub or Calycanthus Family	4
CAMPANULACEAE – Bellflower Family	30
CANNABACEAE – Hemp Family [incl. Celtis]	31
CAPRIFOLIACEAE – Honeysuckle Family [excl. Adoxaceae]	31
CARYOPHYLLACEAE – Pink Family	31
CASUARINACEAE – Casuarina Family	33
CELASTRACEAE – Staff Tree Family	33
CERATOPHYLLACEAE – Hornwort Family	4
CHENOPODIACEAE – Goosefoot Family	33
CISTACEAE – Rock-Rose Family	35
CLEOMACEAE – Spiderflower Family	35
COMMELINACEAE – Spiderwort Family	82
CONVOLVULACEAE – Morning-Glory Family [incl. Cuscutaceae]	36

CORNACEAE – Dogwood Family	36
CRASSULACEAE – Stonecrop Family	37
CROSSOSOMATACEAE – Crossosoma Family	37
CUCURBITACEAE – Gourd Family	37
CUPRESSACEAE – Cypress Family	3
CYPERACEAE – Sedge Family	82
DATISCEAE – Datisca Family	38
DENNSTAEDTIACEAE – Bracken Family	1
DIDIEREACEAE – Didieria Family	38
DIPSACACEAE – Teasel Family	38
DRYOPTERIDACEAE – Wood Fern Family	2
EBENACEAE – Ebony Family	38
ELAEAGNACEAE – Oleaster Family	38
ELATINACEAE – Waterwort Family	38
EPHEDRACEAE – Ephedra Family	4
EQUISETACEAE – Horsetail Family	1
ERICACEAE – Heath Family	38
EUPHORBIACEAE – Spurge Family	39
FABACEAE (LEGUMINOSAE) – Legume Family	41
FAGACEAE – Oak Family	47
FOUQUIERIACEAE – Ocotillo Family	47
FRANKENIACEAE – Frankenia Family	47
GARRYACEAE – Silk Tassel Family	47
GENTIANACEAE – Gentian Family	47
GERANIACEAE – Geranium Family	48
GOODENIACEAE – Goodenia Family	48
GRATIOLACEAE – Gratiola Family	48
GROSSULARIACEAE – Gooseberry Family	48
HALORAGACEAE – Water-Milfoil Family	49
HYDROCHARITACEAE – Waterweed Family [incl. Najadaceae]	84
HYPERICACEAE – St. John's Wort Family	49
IRIDACEAE – Iris Family	84
ISOETACEAE – Quillwort Family	1
JUGLANDACEAE – Walnut Family	49
JUNCACEAE – Rush Family	85
JUNCAGINACEAE – Arrow-Grass Family	85
KRAMERIACEAE – Rhatany Family	49
LAMIACEAE (LABIATAE) – Mint Family	49
LAURACEAE – Laurel Family	4
LILIACEAE – Lily Family	86
LIMNANTHACEAE – Meadowfoam Family	51
LINACEAE – Flax Family	51
LINDERNIACEAE – Lindernia Family	52
LOASACEAE – Loasa Family	52
LYTHRACEAE – Loosestrife Family	52

MALVACEAE – Mallow Family [incl. Sterculiaceae]	52
MARSILEACEAE – Marsilea Family	2
MARTYNIACEAE – Unicorn Plant Family	54
MELANTHIACEAE – Bunch Flower or Camas Family	86
MELIACEAE – Mahogany Family	54
MOLLUGINACEAE – Carpetweed Family	54
MONTIACEAE – Montia Family	54
MORACEAE – Mulberry Family	55
MYRSINACEAE – Myrsine Family [=Primulaceae s.l., sensu APG III]	55
MYRTACEAE – Myrtle Family	55
NELUMBONACEAE – Lotus Family	56
NYCTAGINACEAE – Four O'clock Family	56
OLEACEAE – Olive Family	56
ONAGRACEAE – Evening-Primrose Family	57
OPHIOGLOSSACEAE – Adder's Tongue Family	1
ORCHIDACEAE – Orchid Family	86
OROBANCHACEAE – Broom-Rape Family	59
OXALIDACEAE – Oxalis Family	60
PAEONIACEAE – Peony Family	60
PAPAVERACEAE – Poppy Family [incl. Fumariaceae]	61
PHRYMACEAE – Lopseed Family	61
PHYLLANTHACEAE – Phyllanthus Family	62
PHYTOLACCACEAE – Pokeweed Family	62
PICRODENDRACEAE – Picrodendron Family	62
PINACEAE – Pine Family	3
PITTOSPORACEAE – Pittosporum Family	62
PLANTAGINACEAE – Plantain Family	62
PLATANACEAE – Plane Tree or Sycamore Family	64
PLUMBAGINACEAE – Leadwort Family	64
POACEAE (GRAMINEAE) – Grass Family	87
POLEMONIACEAE – Phlox Family	65
POLYGALACEAE – Milkwort Family	67
POLYGONACEAE – Buckwheat Family	68
POLYPODIACEAE – Polypody Family	2
PONTEDERIACEAE – Pickerel Weed Family	94
PORTULACACEAE – Purslane Family	70
POTAMOGETONACEAE – Pondweed Family	94
PRIMULACEAE – Primrose Family	70
PROTEACEAE – Protea Family	71
PTERIDACEAE – Brake Family	2
RANUNCULACEAE – Buttercup Family	71
RESEDACEAE – Mignonette Family	72
RHAMNACEAE – Buckthorn Family	72
ROSACEAE – Rose Family	73
RUBIACEAE – Madder or Coffee Family	75

RUPPIACEAE – Ditch-Grass Family	95
RUSCACEAE – Butcher’s Broom Family [incl. Convallariaceae, Nolinaceae; =Asparagaceae s.l., sensu APG III]	95
RUTACEAE – Rue or Citrus Family	75
SALICACEAE – Willow Family	76
SALVINIACEAE – Water Spangle Family	3
SAPINDACEAE – Soapberry Family [incl. Aceraceae]	76
SAURURACEAE – Lizard’s Tail Family	4
SAXIFRAGACEAE – Saxifrage Family	76
SCROPHULARIACEAE S.S. – Figwort Family [incl. Myoporaceae]	77
SELAGINELLACEAE – Spike-Moss Family	1
SIMAROUACEAE – Quassia or Simarouba Family	77
SIMMONDSIACEAE – Jojoba Family	77
SOLANACEAE – Nightshade Family	77
STYRACACEAE – Storax Family	78
TAMARICACEAE – Tamarisk Family	78
THEMIDACEAE – Brodiaea Family	95
THEOPHRASTACEAE – Theophrasta Family [=Primulaceae s.l., APG III]	79
TROPAEOLACEAE – Nasturtium Family	79
TYPHACEAE – Cattail Family [incl. Sparganiaceae]	95
ULMACEAE – Elm Family	79
URTICACEAE – Stinging Nettle Family	79
VALERIANACEAE – Valerian Family	79
VERBENACEAE – Vervain Family	79
VIOLACEAE – Violet Family	80
VISCACEAE – Mistletoe Family [=Santalaceae s.l., sensu APG III]	80
VITACEAE – Grape Family	80
WOODSIACEAE – Cliff Fern Family	3
ZANNICHELLIACEAE – Horned-Pondweed Family [=Potamogetonaceae s.l., sensu APG III]	96
ZOSTERACEAE – Eel-Grass Family	96
ZYGOPHYLLACEAE – Caltrop Family	80

SAN DIEGO COUNTY VASCULAR PLANT CHECKLIST: Documented with Herbarium Vouchers

LYCOPHYTES [=LYCOPODS]

ISOETACEAE – Quillwort Family

- | | |
|--|---------------------|
| <i>Isoetes howellii</i> Engelm. {SD 114739} | HOWELL'S QUILLWORT |
| <i>Isoetes nuttallii</i> Engelm. {SD 20744} | NUTTALL'S QUILLWORT |
| <i>Isoetes orcuttii</i> A.A. Eaton {SD 106563} | ORCUTT'S QUILLWORT |

SELAGINELLACEAE – Spike-Moss Family

- | | |
|--|---------------------------------------|
| <i>Selaginella asprella</i> Maxon {SD 114716} | BLUISH SPIKE-MOSS |
| 4.3 S3.3 G4G5 | |
| <i>Selaginella bigelovii</i> Underw. {SD 120903} | BIGELOW'S SPIKE-MOSS |
| <i>Selaginella cinerascens</i> A.A. Eaton {SD 77924} | 4.1 S3S4 G3G4 MESA SPIKE-MOSS |
| <i>Selaginella eremophila</i> Maxon {SD 20185} | 2B.2 S2S3 G4 DESERT SPIKE-MOSS |

EQUISETOPHYTES [=SPHENOPSIDS]

EQUISETACEAE – Horsetail Family

- | | |
|---|------------------------|
| <i>Equisetum arvense</i> L. {SD 85850} | COMMON HORSETAIL |
| <i>Equisetum xferriissii</i> Clute {SD 22181} | FERRIS'S SCOURING-RUSH |
| [E. hymale x E. laevigatum] | |
| <i>Equisetum hyemale</i> L. subsp. <i>affine</i> (Engelm.) Calder & Roy L. Taylor {SD 163270} | COMMON SCOURING-RUSH |
| <i>Equisetum laevigatum</i> A. Braun {SD 76071} | SMOOTH SCOURING-RUSH |
| <i>Equisetum telmateia</i> Ehrh. subsp. <i>braunii</i> (J. Milde) Hauke {SD 112406} | GIANT HORSETAIL |

OPHIOGLOSSOID FERNS

OPHIOGLOSSACEAE – Adder's Tongue Family

- | | |
|---|---------------------------|
| <i>Ophioglossum californicum</i> Prantl {SD 117871} | CALIFORNIA ADDER'S TONGUE |
| 4.2 S3.2 G4 | |

LEPTOSPORANGIATE FERNS

ASPLENIACEAE – Spleenwort Family

- | | |
|--|--------------------|
| <i>Asplenium vespertinum</i> Maxon {SD 128222} | WESTERN SPLEENWORT |
| 4.2 S3.2 G3? | |

AZOLLACEAE – Mosquito Fern Family

- | | |
|--|-----------------------|
| <i>Azolla filiculoides</i> Lam. {SD 86073} | PACIFIC MOSQUITO FERN |
|--|-----------------------|

BLECHNACEAE – Deer Fern Family

- | | |
|---|------------------|
| <i>Woodwardia fimbriata</i> Sm. {SD 115130} | GIANT CHAIN FERN |
|---|------------------|

DENNSTAEDTIACEAE – Bracken Family

- | | |
|---|-----------------|
| <i>Pteridium aquilinum</i> (L.) Kuhn var. <i>pubescens</i> Underw. {SD 20729} | WESTERN BRACKEN |
|---|-----------------|

DRYOPTERIDACEAE – Wood Fern Family

- **Cyrtomium falcatum* (L. f.) C. Presl {SD 130874} HOUSE HOLLY FERN
Dryopteris arguta (Kaulf.) Maxon {SD 83570} COASTAL WOOD FERN
 *†*Nephrolepis cordifolia* (L.) C. Presl {SD 175771} NARROW SWORD FERN
Polystichum imbricans (D.C. Eaton) D.H. Wagner subsp. *curtum* (Ewan) D.H. WAGNER {SD 16264} CANYON SWORD FERN
Polystichum imbricans (D.C. Eaton) D.H. Wagner subsp. *imbricans* {SD 194136} NARROW-LEAF SWORD FERN
Polystichum munitum (Kaulf.) C. Presl {DES 00001099} WESTERN SWORD FERN

MARSILEACEAE – Marsilea Family

- Marsilea vestita* Hook. & Grev. subsp. *vestita* {SD 72867} HAIRY CLOVER FERN
Pilularia americana A. Braun {SD 106793} AMERICAN PILLWORT

POLYPODIACEAE – Polypody Family

- Polypodium californicum* Kaulf. {SD 128774} CALIFORNIA POLYPODY

PTERIDACEAE – Brake Family

- Adiantum capillus-veneris* L. {SD 90792} SOUTHERN MAIDENHAIR
Adiantum jordanii Müll. Hal. {SD 73377} CALIFORNIA MAIDENHAIR
Aspidotis californica (Hook.) Copel. {SD 82456} CALIFORNIA LACE FERN
 [Cheilanthes californica (Hook.) Mett.]
Aspidotis densa (Brack.) Lellinger {SD 122680} INDIAN'S DREAM
 [Onychium d. Brackenr.]
Myriopteris clevelandii (D.C. Eaton) Grusz & Windham {SD 106799} [Cheilanthes c. D.C. Eaton] CLEVELAND'S LIP FERN
Myriopteris covillei (Maxon) Á. Löve & D. Löve {SD 86164} [Cheilanthes c. Maxon] COVILLE'S LIP FERN
Myriopteris intertexta (Maxon) Grusz & Windham {SD 194137} [Cheilanthes i. (Maxon) Maxon] COASTAL LIP FERN
Myriopteris newberryi (D.C. Eaton) Grusz & Windham {SD 74716} [Cheilanthes n. (D.C. Eaton) Domin] CALIFORNIA COTTON FERN
Myriopteris xparishii (Davenp.) Grusz & Windham {SD 80828} [Cheilanthes xparishii Davenp.] PARISH'S LIP FERN
Myriopteris parryi (D.C. Eaton) Grusz & Windham {SD 83517} [Cheilanthes p. (D.C. Eaton) Domin] PARRY'S CLOAK FERN
Myriopteris viscida (Davenp.) Grusz & Windham {SD 120998} [Cheilanthes v. Davenp.] VISCID LIP FERN
 †*Notholaena californica* D.C. Eaton subsp. *californica* {SD 20837} [Cheilanthes deserti Mickel] CALIFORNIA CLOAK FERN
 †*Pellaea andromedifolia* (Kaulf.) Fée var. *andromedifolia* {SD 115129} COFFEE FERN
 Note: Varieties of P. a. not recognized in Jepson II.
 †*Pellaea andromedifolia* (Kaulf.) Fée var. *pubescens* D.C. Eaton {SD 86159} HAIRY COFFEE FERN
Pellaea mucronata (D.C. Eaton) D.C. Eaton var. *mucronata* {SD 114920} BIRD'S FOOT CLIFF-BRAKE
Pellaea truncata Goodd. {SD 145483} SPINY CLIFF-BRAKE

- Pentagramma triangularis* (Kaulf.) Yatsk. et al. subsp. *maxonii* (Weath.) Yatsk.
et al. {SD 80639} MAXON'S SILVERBACK FERN
[Pityrogramma t. (Kaulf.) Maxon var. m. Weath.]
- §† *Pentagramma triangularis* (Kaulf.) Yatsk. et al. subsp. *rebmamii* Winner & M.G.
Simpson {SD 157262} REBMAN'S SILVERBACK FERN
Note: This variety not yet recognized in Jepson II.
- Pentagramma triangularis* (Kaulf.) Yatsk. et al. subsp. *triangularis* {SD 114919}
[Pityrogramma t. var. t.] CALIFORNIA GOLDBACK FERN
- Pentagramma triangularis* (Kaulf.) Yatsk. et al. subsp. *viscosa* (D.C. Eaton) Yatsk.
et al. {SD 82486} STICKY SILVERBACK FERN
[Pityrogramma t. var. v. (D.C. Eaton) Weath.]
- **Pteris vittata* L. {SD 211349} LADDER BRAKE

SALVINIACEAE – Water Spangle Family

- **Salvinia minima* Baker {SD 222102} COMMON WATER-SPANGLE

WOODSIACEAE – Cliff Fern Family

- Cystopteris fragilis* (L.) Bernh. {SD 106579} BRITTLE BLADDER FERN

CONIFERS

CUPRESSACEAE – Cypress Family

- Calocedrus decurrens* (Torr.) Florin {SD 112370} CALIFORNIA INCENSE CEDAR
- Hesperocyparis forbesii* (Jeps.) Bartel {SD 98746} TECATE CYPRESS
[Cupressus f. Jeps.; Cupressus guadalupensis S. Watson var. f. (Jeps.) Little;
Callitropsis f. (Jeps.) D.P. Little] **1B.1 S2 G2**
- §§ *Hesperocyparis stephensonii* (C.B. Wolf) Bartel {SD 98741} CUYAMACA CYPRESS
[Cupressus s. C.B. Wolf; Callitropsis s. (C.B. Wolf) D.P. Little; Callitropsis arizonica
(Greene) D.P. Little, misappl.; Cupressus arizonica var. glabra (Sudw.) Little,
misappl.] Note: This species is now considered endemic to our County; see Adams
et al. 2014. **1B.1 S1 G1**
- Juniperus californica* Carrière {SD 19748} CALIFORNIA JUNIPER

PINACEAE – Pine Family

- Abies concolor* (Gordon & Glend.) Hildebr. {SD 132521} [A. c. var. c.] WHITE FIR
- Pinus attenuata* Lemmon {SD 162001} KNOBCONE PINE
- Pinus coulteri* D. Don {SD 137992} COULTER PINE
- *† *Pinus halepensis* Mill. {SD 184053, 222661} ALEPPO PINE
- Pinus jeffreyi* Grev. & Balf. {SD 12530, 112158} JEFFREY/YELLOW PINE
- Pinus lambertiana* Douglas {SD 16376} SUGAR PINE
- Pinus monophylla* Torr. & Frém. {SD 12994} SINGLE-LEAF PINYON
- *† *Pinus pinea* L. {SD 193177} ITALIAN STONE PINE
- Pinus ponderosa* Lawson & C. Lawson var. *pacifica* J.R. Haller & Vivrette
{SD 16243} PACIFIC PONDEROSA PINE
Note: Our determination to variety is based largely on geography, as there is
considerable variation in the morphological features distinguishing them.
- Pinus quadrifolia* Sudw. {SD 85608} PARRY PINYON
- §§ *Pinus torreyana* Carrière subsp. *torreyana* {SD 112168} TORREY PINE
1B.2 S1 G1T1
- Pseudotsuga macrocarpa* (Vasey) Mayr {SD 40365} BIG-CONE DOUGLAS FIR

GNETALES

EPHEDRACEAE – Ephedra Family

- Ephedra aspera* S. Watson {SD 85434, 24457} BOUNDARY EPHEDRA
 [E. fasciculata A. Nelson var. *clokeyi* (H.C. Cutler) Clokey; E. f. var. f.]
Ephedra californica S. Watson {SD 86074} CALIFORNIA EPHEDRA
Ephedra nevadensis S. Watson {SD 120711} NEVADA EPHEDRA
Ephedra trifurca S. Watson {UC 1005090} THREE-FORK EPHEDRA
Ephedra viridis Coville {SD 155525} GREEN EPHEDRA

ANGIOSPERMS: MAGNOLIIDS-LAURALES

CALYCANTHACEAE – Sweet Shrub or Calycanthus Family

- Calycanthus occidentalis* Hook. & Arn. {SD 130564} SWEET SHRUB, SPICEBUSH

LAURACEAE – Laurel Family

- *† *Cinnamomum camphora* (L.) J. Presl. {SD 154859} CAMPHOR TREE
Umbellularia californica (Hook. & Arn.) Nutt. {SD 70925} CALIFORNIA BAY

ANGIOSPERMS: MAGNOLIIDS-PIPERALES

SAURURACEAE – Lizard's Tail Family

- Anemopsis californica* (Nutt.) Hook. & Arn. {SD 126665} YERBA MANSA

ANGIOSPERMS: CERATOPHYLLALES

CERATOPHYLLACEAE – Hornwort Family

- Ceratophyllum demersum* L. {SD 106715} HORNWORT

ANGIOSPERMS: EUDICOTS

ACANTHACEAE – Acanthus Family [incl. Avicenniaceae]

- * *Avicennia marina* (Forssk.) Vierh. var. *australasica* (Walp.) Moldenke
 {SD 129927} Note: Formerly in Verbenaceae MANGROVE, MANAWA
 [*Avicennia marina* (Forssk.) Vierh. var. *resinifera* (G. Forst.) Bakh.]
Carlowrightia arizonica A. Gray {SD 168625} ARIZONA CARLOWRIGHTIA
 2B.2 S2 G4G5
Justicia californica (Benth.) D.N. Gibson {SD 122440} CHUPAROSA, BELOPERONE

ADOXACEAE – Adoxa Family

- Sambucus nigra* L. subsp. *caerulea* (Raf.) Bolli {SD 71724, 126700}
 [S. caerulea Raf.; S. mexicana DC., misappl.] BLUE ELDERBERRY

AIZOACEAE – Fig-Marigold Family

- * *Aptenia cordifolia* (L. f.) Schwantes BABY SUN ROSE, SHRUBBY DEWPLANT
 {SD 24323} [Including red hybrid cultivar “Red Apple”]
* *Carpobrotus chilensis* (Molina) N.E. Br. {SD 40036} SEA-FIG
 [C. aequilaterus (Haw.) N.E. Br.]
* *Carpobrotus edulis* (L.) N.E. Br. {SD 52569} HOTTENTOT-FIG
* *Cypselea humifusa* Turpin {SD 124511} PANAL
* *Drosanthemum floribundum* (Haw.) Schwantes {SD 177555} SHOWY DEWFLOWER
*† *Galenia pubescens* (Ecklon & Zeyher) Druce {SD 183087} COASTAL GALENIA
*† *Lampranthus* cf. *coccineus* (Haworth) N.E. Br. {SD 177553} REDFLUSH

- *†*Lampranthus* cf. *tenuifolius* N.E. Br. {SD 177554} TRAILING PINK ICEPLANT
 **Malephora crocea* (Jacq.) Schwantes var. *crocea* {SD 152123} CROCEA ICEPLANT
 *†*Malephora crocea* (Jacq.) Schwantes var. *purpureocrocea* (Haworth) H. Jacobsen
 & Schwantes {SD 157640} PURPLE MALEPHORA
 Note: Variety recognized in FNA, vol. 4.
 *†*Malephora luteola* (Haw.) Schwant. {SD 193206} ROCKY POINT ICEPLANT
 **Mesembryanthemum crystallinum* L. {SD 112946} CRYSTALLINE ICEPLANT
 **Mesembryanthemum nodiflorum* L. {SD 80491} SLENDER-LEAF ICEPLANT
 †*Sesuvium portulacastrum* (L.) L. {SD 5675} SEA-PURSLANE
Sesuvium verrucosum Raf. {SD 16346} WESTERN SEA-PURSLANE
 **Tetragonia tetragonioides* (Pall.) Kuntze {SD 80396} NEW ZEALAND-SPINACH
Trianthema portulacastrum L. {SD 232121} HORSE-PURSLANE

AMARANTHACEAE – Amaranth Family

- **Amaranthus albus* L. {SD 124472} WHITE TUMBLEWEED
 **Amaranthus arenicola* I.M. Johnst. {RSA 200028} SAND AMARANTH
Amaranthus blitoides S. Watson {SD 54847} PROSTRATE AMARANTH
 **Amaranthus blitum* L. subsp. *emarginatus* (Uline & W.L. Bray) Carretero et al.
 {SD 153130} PURPLE AMARANTH
Amaranthus californicus (Moq.) S. Watson {SD 106652} CALIFORNIA AMARANTH
 **Amaranthus deflexus* L. {SD 112937} LOW AMARANTH
Amaranthus fimbriatus (Torr.) S. Watson {SD 118896} FRINGE AMARANTH
 **Amaranthus hybridus* L. {SD 8010} SLENDER PIGWEED
Amaranthus palmeri S. Watson {SD 23189, 37008} PALMER'S AMARANTH
Amaranthus powellii S. Watson {SD 112940} POWELL'S AMARANTH
 **Amaranthus retroflexus* L. {SD 53598} ROUGH PIGWEED
 *†*Amaranthus viridis* L. {SD 156807} SLENDER AMARANTH
Amaranthus watsonii Standl. {SD 20060} WATSON'S AMARANTH
Nitrophila occidentalis (Moq.) S. Watson {SD 22898} AMERICAN NITROPHILA
Tidestromia suffruticosa (Torr.) Standl. var. *oblongifolia* (S. Watson) Sanch. Pino &
 Flores Oliv. {SD 130571} SALTON SEA HONEYSWEET
 [This variety recognized in FNA, vol. 4; T. o.; T. o. subsp. *cryptantha* (S. Watson)
 Wiggins]

ANACARDIACEAE – Sumac or Cashew Family

- Malosma laurina* (Nutt.) Abrams {SD 127802} LAUREL SUMAC
 *†*Pistacia chinensis* Bunge {SD 183094} CHINESE PISTACHE
 †*Rhus aromatica* Aiton var. *simplicifolia* (Greene) Conquist {SD 118139}
 SINGLE-LEAF SKUNKBRUSH
 [Rhus trilobata Nutt. var. *simplicifolia* (Greene) Bark] **2B.3 S2 G5T3T5**
Rhus aromatica Aiton var. *aromatica* {SD 15530} SKUNKBRUSH
 [Rhus trilobata Nutt.; R. t. var. *anisophylla* (Greene) Jeps., var. *quinata* (Greene)
 Jeps., var. *pilosissima* Eng. in DC]
Rhus integrifolia (Nutt.) Rothr. {SD 118571} LEMONADEBERRY
Rhus integrifolia × *R. ovata* {SD 168894} HYBRID SUGARBERRY
Rhus ovata S. Watson {SD 111473} SUGAR BUSH
 **Schinus molle* L. {SD 20242} PERUVIAN PEPPER TREE
 **Schinus terebinthifolius* Raddi {SD 154426} BRAZILIAN PEPPER TREE

- **Searsia lancea* (L. f.) F.A. Barkley {SD 165870} AFRICAN SUMAC
 [Rhus l. L. f.]
Toxicodendron diversilobum (Torr. & A. Gray) Greene WESTERN POISON-OAK
 {SD 131235} [T. radicans (L.) Kuntze subsp. *diversilobum* (Torr. & A. Gray) Thorne]

APIACEAE (UMBELLIFERAE) – Carrot Family

- **Ammi majus* L. {SD 136262} LARGER BISHOP'S WEED
 **Anethum graveolens* L. {SD 21779} COMMON DILL
Angelica tomentosa S. Watson {SD 72127} CALIFORNIA ANGELICA
 **Anthriscus caucalis* M. Bieb. {SD 88134} BUR CHERVIL
 [A. scandicina Mansfeld]
Apiastrum angustifolium Nutt. {SD 119088} MOCK-PARSLEY
 **Apium graveolens* L. {SD 118609} COMMON CELERY
Berula erecta (Huds.) Coville {SD 106644} CUT-LEAF WATER-PARSNIP
Bowlesia incana Ruiz & Pav. {SD 115107} AMERICAN BOWLESIA
 *†*Bupleurum lancifolium* Hornem. {SD 49321} LANCE-LEAF HARE'S EAR
Cicuta douglasii (DC.) J.M. Coult. & Rose {SD 112969} DOUGLAS'S WATER HEMLOCK

SHRUBBY TIQUILIA

{SD 138913}

Tiquilia palmeri (A. Gray) A.T. Richardson {SD 118382}

PALMER'S TIQUILIA

Tiquilia plicata (Torr.) A.T. Richardson {SD 118876}

PLICATE TIQUILIA

BRASSICACEAE (CRUCIFERAE) – Mustard Family

- *Arabidopsis thaliana* (L.) Heynh. {SD 92907} MOUSE-EAR CRESS
- Athysanus pusillus* (Hook.) Greene {SD 128518} DWARF ATHYSANUS
- Barbarea orthoceras* Ledeb. {SD 73574} ERECT-POD WINTER-CRESS
- Boechera arcuata* (Nutt.) Windham & Al-Shehbaz ELEGANT ROCK-CRESS
{SD 130563} [*Arabis sparsiflora* Nutt. var. *arcuata* (Nutt.) Rollins]
- Boechera californica* (Rollins) Windham & Al-Shehbaz CALIFORNIA ROCK-CRESS
{SD 104506} [*Arabis sparsiflora* Nutt. var. *californica* Rollins]
- Boechera johnstonii* (Munz) Al-Shehbaz {SD 145531} JOHNSTON'S ROCK-CRESS
[*Arabis hirshbergiae* S. Boyd; *Arabis johnstonii* Munz] **1B.2 S1 G1**
- Boechera perennans* (S. Watson) W.A. Weber {SD 104502} NEVADA ROCK-CRESS
[*Arabis perennans* S. Watson]
- Boechera pulchra* (S. Watson) W.A. Weber {SD 121697} BEAUTIFUL ROCK-CRESS
[*Arabis pulchra* S. Watson]
- Boechera xylopoda* Windham & Al-Shehbaz BIGFOOT HYBRID ROCK-CRESS
{SD 114715} [*Arabis pulchra* S. Watson var. *gracilis* M.E. Jones]
- *Brassica fruticulosa* Cirillo {SD 212772} MEDITERRANEAN CABBAGE
- *Brassica napus* L. {SD 143674} SWEDE RAPE, RAPESEED
- *Brassica nigra* (L.) W.D.J. Koch {SD 80482} BLACK MUSTARD
- *Brassica rapa* L. {SD 124474} TURNIP, FIELD MUSTARD
[*B. r.* subsp. *sylvestris* (L.) Janchen]
- *Brassica tournefortii* Gouan {SD 118105} SAHARA MUSTARD
- *Cakile edentula* (Bigelow) Hook. {SD 21072} AMERICAN SEA ROCKET
- *Cakile maritima* Scop. {SD 80397} EUROPEAN SEA ROCKET
- *Camelina microcarpa* DC. {SD 123441} BIG-SEED FALSE-FLAX
- *Capsella bursa-pastoris* (L.) Medik. {SD 28316} SHEPHERD'S PURSE
- Cardamine californica* (Nutt.) Greene {SD 139316, 130562} MILKMAIDS, TOOTHWORT
[*C. c.* var. *integrifolia* (Nutt.) Rollins]
- *†Cardamine flexuosa* With. {SD 140583} WOODLAND BITTERCRESS
- *Cardamine hirsuta* L. {SD 208303} HAIRY BITTERCRESS
- Cardamine oligosperma* Nutt. {SD 115236} IDAHO BITTERCRESS
- *†Carrichtera annua* (L.) DC. {SD 176967} WARD'S WEED
- Caulanthus cooperi* (S. Watson) Payson {SD 52536} COOPER'S CAULANTHUS
- Caulanthus hallii* Payson {SD 130427} HALL'S CAULANTHUS
- Caulanthus heterophyllus* (Nutt.) Payson SAN DIEGO JEWELFLOWER
{SD 121073, 10295} [*Caulanthus heterophyllus* var. *pseudosimulans*, ined.]
- Note: Var. *pseudosimulans*, ined. warrants formal recognition based on morphological and geographic differences.
- Caulanthus lasiophyllus* (Hook. & Arn.) Payson CALIFORNIA MUSTARD
{SD 47533} [*Guillenia lasiophylla* (Hook. & Arn.) Greene]
- Caulanthus simulans* Payson {SD 113245} PAYSON'S CAULANTHUS
- 4.2 S3.2 G3**
- Descurainia adenophora* (Wooton & Standl.) O.E. Schulz WHITE TANSY-MUSTARD
{SD 222662}
- Descurainia incana* (Fisch. & C.A. Mey.) Dorn MOUNTAIN TANSY-MUSTARD
{JEPS 53426} [*D. richardsonii* (Sweet) O. Schulz subsp. *viscosa* (Rydb.) Detl.]
- Descurainia pinnata* (Walter) Britton subsp. *brachycarpa* (Richardson) Detling
{SD 85594, 131265, 20441} WESTERN TANSY-MUSTARD
- Note: Current taxonomy of *D. p.* subsp. does not reflect the variation in our County, esp. with a coastal, glandular form.

- Descurainia pinnata* (Walter) Britton subsp. **glabra** (Wooton & Standl.) Detling
 {SD 141822} SMOOTH WESTERN TANSY-MUSTARD
- Descurainia pinnata* (Walter) Britton subsp. **ochroleuca** (Wooton) Detling
 {SD 229009} YELLOW TANSY-MUSTARD
- **Descurainia sophia* (L.) Prantl {SD 44849} FINE-LEAF TANSY-MUSTARD
- **Diplotaxis muralis* (L.) DC. {SD 142795} WALL ROCKET
- Dithyrea californica* Harv. {SD 83418} CALIFORNIA SPECTACLE-POD
- Draba cuneifolia* Torr. & A. Gray var. **cuneifolia** {SD 155646} WEDGELEAF WHITLOW-GRASS
 Note: Intraspecies are recognized for this species in the FNA treatment.
- Draba cuneifolia* Torr. & A. Gray var. **integrifolia** S. Watson {SD 10179} DESERT WHITLOW-GRASS
- **Draba reptans* (Lam.) Fernald {SD 24614} CALIFORNIA WHITLOW
- Draba verna* L. {SD 106704} VERNAL WHITLOW
 [Erophila v. (L.) Chevall]
- **Eruca vesicaria* (L.) Cav. subsp. **sativa** (Mill.) Thell. {SD 16478} GARDEN ROCKET
- Erysimum ammophilum* A. Heller {SD 134503} COAST WALLFLOWER
- 1B.2 S2.2 G2**
- Erysimum capitatum* (Hook.) Greene var. **capitatum** {SD 118622} WESTERN WALLFLOWER
- **Hirschfeldia incana* (L.) Lagr.-Fossat {SD 67533} SHORT-POD MUSTARD
 [Brassica geniculata (Desf.) J. Ball]
- Hornungia procumbens* (L.) Hayek {SD 10414} PROSTRATE HUTCHINSIA
 [Hutchinsia procumbens (L.) Desv.]
- *†*Iberis umbellata* L. {SD 154688} GLOBE CANDYTUFT
- **Lepidium appelianum* Al-Shehbaz {SD 156679} WHITE-TOP/GLOBE-POD HOARY-CRESS
 [Cardaria pubescens (C.A. Mey.) Jarm.]
- **Lepidium campestre* (L.) W.T. Aiton {SD 183366} COW-CRESS
- **Lepidium chalepensis* L. {SD 15273} LENS-POD HOARY-CRESS
 [Cardaria chalepensis (L.) Hand.-Mazz.]
- Lepidium densiflorum* Schrad. {SD 154856} COMMON PEPPERGRASS
 [L. d. Schrad. var. d.]
- Lepidium dictyotum* A. Gray {UC 494507} ALKALI PEPPERGRASS
- **Lepidium didymum* L. {SD 53669} LESSER WART-CRESS
 [Coronopus didymus (L.) Sm.]
- **Lepidium draba* L. {SD 113130} HEART-POD HOARY-CRESS
 [Cardaria draba (L.) Desv.]
- Lepidium flavum* Torr. {SD 118128} BORREGO VALLEY PEPPERGRASS
 [L. f. var. felipense C.L. Hitchc.; CNPS Inventory listing of var.: **1B.2 S1 G5T1**]
- Lepidium fremontii* S. Watson {SD 119046} DESERT PEPPERGRASS
 [L. f. var. f.]
- Lepidium lasiocarpum* Torr. & A. Gray subsp. **lasiocarpum** {SD 83386} SAND PEPPERGRASS
 [L. l. var. l.]
- **Lepidium latifolium* L. {SD 138910} BROAD-LEAF PEPPERGRASS
- Lepidium latipes* Hook. {SD 138909} DWARF PEPPERGRASS
 [L. l. var. l.]
- Lepidium nitidum* Nutt. {SD 24278} SHINING PEPPERGRASS
 [L. n. var. n.]

- †*Lepidium oblongum* Small var. *insulare* C.L. Hitchc VEINY PEPPERGRASS
 {SD 10911} Note: We elect to recognize this var. of *L. o.*, not recognized in
 Jepson II, based on observed morphological differences.
- Lepidium oblongum* Small var. *oblongum* {SD 53634} WAYSIDE PEPPERGRASS
- **Lepidium perfoliatum* L. {SD 45601} CLASPING PEPPERGRASS
- **Lepidium pinnatifidum* Ledeb. {CDA 3821} FEATHER-LEAF PEPPERGRASS
- Lepidium ramosissimum* A. Nelson {SD 153068} BRANCHED PEPPERGRASS
 [L. r. var. *bourgeauanum* (Thell.) Rollins]
- **Lepidium strictum* (S. Watson) Rattan {SD 53634} UPRIGHT PEPPERGRASS
- Lepidium virginicum* L. subsp. *menziesii* (DC.) Thell. MENZIES'S PEPPERGRASS
 {SD 122482} [L. v. var. *medium* (Greene) C. L. Hitchc.; L. v. var. *pubescens*
 (Greene) Thell.]
- †*Lepidium virginicum* L. var. *robinsonii* (Thell.) C.L. Hitchc. {SD 13973}
 ROBINSON'S PEPPERGRASS
 Note: We elect to recognize this var. of *L. v.*, not recognized in Jepson II, based on
 observed morphological differences. **4.3 S3 G5T3**
- Lepidium virginicum* L. subsp. *virginicum* {SD 161425} VIRGINIA PEPPERGRASS
- **Lobularia maritima* (L.) Desv. {SD 115700} SWEET ALYSSUM
- Lyrocarpa coulteri* Hook. & Harv. {SD 80923} COULTER'S LYREPOD
 [L. c. var. *palmeri* (S. Watson) Rollins] **4.3 S3.3 G4**
- *†*Malcolmia graeca* Boiss. & Spruner {SD 154689} MALCOLM STOCK

VITACEAE – Grape Family

- Parthenocissus vitacea* (Kner) Hitchc. {SD 122707} WOODBINE
Vitis girdiana Munson {SD 79421} SOUTHERN CALIFORNIA WILD GRAPE
 **Vitis vinifera* L. {SD 161898} CULTIVATED GRAPE, WINE GRAPE

ZYGOPHYLLACEAE – Caltrop Family

- Fagonia laevis* Standl. {SD 52538} CALIFORNIA FAGONIA
Fagonia pachyacantha Rydb. {SD 121081} STICKY FAGONIA
Kallstroemia californica (S. Watson) Vail {SD 120063} CALIFORNIA CALTROP
Kallstroemia parviflora Norton {SD 16447} WARTY CALTROP
Larrea tridentata (DC.) Coville {SD 118443} CREOSOTE BUSH
 [L. *divaricata* Cav. subsp. t. (DC.) Felger & Lowe]
 **Tribulus terrestris* L. {SD 115724} PUNCTURE VINE

ANGIOSPERMS: MONOCOTS

AGAVACEAE – Agave Family

- *†*Agave americana* L. {SD 225168} AMERICAN AGAVE
Agave deserti Engelm. var. *deserti* {SD 140503} DESERT AGAVE
 [A. d. subsp. d.] Note: Subspecies recognized by Gentry 1978.
Agave shawii Engelm. var. *shawii* {SD 79406} SHAW'S AGAVE
 [A. s. subsp. s.] Note: Subspecies recognized by Gentry 1978. **2B.1 S1.2 G2G3**
Chlorogalum parviflorum S. Watson SMALL-FLOWER SOAP-PLANT/AMOLE
 {SD 139376}
Chlorogalum pomeridianum (DC.) Kunth var. *pomeridianum*
 {SD 86077} WAVY-LEAF SOAP-PLANT/AMOLE
Hesperocallis undulata A. Gray {SD 118110} DESERT LILY
Hesperoyucca whipplei (Torr.) Trel. {SD 111488} CHAPARRAL CANDLE
 [Yucca whipplei Torr.]
 *†*Yucca gloriosa* L. {SD 173303} SPANISH DAGGER
Yucca schidigera Ortgies {SD 131292} MOHAVE YUCCA

ALISMATACEAE – Water-Plantain Family

- Alisma triviale* Pursh {SD 152407} WATER-PLANTAIN
 [Alisma plantago-aquatica L., misappl.]
Echinodorus berteroi (Spreng.) Fassett {SD 141451} BURHEAD
 *†*Sagittaria lancifolia* L. subsp. *media* (M. Micheli) Bogin
 {SD 18323} BULLTONGUE ARROWHEAD
Sagittaria montevidensis Cham. & Schldtl. subsp. *calycina* (Engelm.) Bogin
 {SD 140602} HOODED ARROWHEAD

ALLIACEAE – Onion Family

- Allium amplexans* Torr. {SD 122737} PAPER ONION
Allium campanulatum S. Watson {SD 85956} SIERRA ONION
Allium fimbriatum S. Watson var. *fimbriatum* {SD 122366} DESERT ONION
Allium haematochiton S. Watson {SD 120678} RED-SKIN ONION
Allium lacunosum S. Watson var. *davisiae* (M.E. Jones) McNeal & Ownbey
 {SD 131289} JONES'S ONION
Allium marvinii Davidson {SD 129859} **1B.1 S1 G1** YUCAIPA ONION
 [previously included in A. haematochiton]
Allium parryi S. Watson {SD 128559} PARRY'S ONION
 [A. fimbriatum S. Watson var. p. (S. Watson) F. Ownby & Aase]
Allium peninsulare Greene var. *peninsulare* {SD 99529} RED-FLOWER ONION
Allium praecox Brandegee {SD 85423} EARLY ONION
 **Nothoscordum gracile* (Aiton) Stearn {SD 45366} YELLOW FALSE-GARLIC
 [N. inodorum (Aiton) Nicholson; see Stearn 1986.]

AMARYLLIDACEAE – Amaryllis Family

- **Amaryllis belladonna* L. {SD 143685} BELLADONNA-LILY
 **Leucojum aestivum* L. {SD 185999} SUMMER SNOWFLAKE
 **Narcissus pseudonarcissus* L. {SD 154131} NARCISSUS
 **Narcissus tazetta* L. {SD 159321} CREAM NARCISSUS

APONOGETONACEAE – Cape-Pondweed Family

- **Aponogeton distachyos* L. f. {SD 120702} CAPE-PONDWEED
[*A. distachyon*, spelling variant]

ARACEAE – Arum/Duckweed Family [incl. Lemnaceae]

- Lemna gibba* L. {SD 114846} SWOLLEN DUCKWEED
Lemna minor L. {SD 114840} COMMON DUCKWEED
Lemna minuta Kunth {SD 130876} LEAST DUCKWEED
[*L. minuscula* Herter]
Lemna turionifera Landolt {SD 117597} TURION DUCKWEED
Lemna valdiviana Phil. {SD 115787} VALDIVIA DUCKWEED
Spirodela punctata (G. Meyer) C. Thompson {SD 114817} DUCKMEAT
Wolffia arrhiza (L.) Wimm. {SD 129773} COMMON WATER-MEAL
Wolffia borealis (Hegelm.) Landolt & Wildi {SD 105410} NORTHERN WATER-MEAL
Wolffia columbiana H. Karst. {SD 117146} COLUMBIAN WATER-MEAL
Wolffia globosa (Roxb.) Hartog & Plas {SD 129774} ASIAN WATER-MEAL
**Zantedeschia aethiopica* (L.) Spreng. {SD 122674} CALLA-LILY

ARECACEAE (PALMAE) – Palm Family

- **Phoenix canariensis* Chabaud {SD 144520} CANARY ISLAND DATE PALM
**Phoenix dactylifera* L. {SD 227921} EDIBLE DATE PALM
**Syagrus romanzoffiana* (Cham.) Glassman {SD 152408} QUEEN PALM
Washingtonia filifera (André) de Bary {SD 16442} CALIFORNIA FAN PALM
**Washingtonia robusta* H. Wendl. {SD 144521} MEXICAN FAN PALM

ASPARAGACEAE – Asparagus Family

- **Asparagus asparagoides* (L.) Druce {SD 115696} FLORIST'S-SMILAX
*†*Asparagus densiflorus* (Kunth) Jessop {SD 153064} SPRENGER'S ASPARAGUS-FERN
**Asparagus officinalis* L. subsp. *officinalis* {SD 16029} GARDEN ASPARAGUS
**Asparagus setaceus* (Kunth) Jessop {SD 118576} ASPARAGUS-FERN

ASPHODELACEAE – Asphodel Family

- **Aloe maculata* All. {SD 210496} SOAP ALOE
[*A. saponaria* (Aiton) Haw.]
**Aloe x-schoenlandii* Baker {SD 136448} ALOE
**Asphodelus fistulosus* L. {SD 130579} HOLLOW-STEM ASPHODEL

COMMELINACEAE – Spiderwort Family

- **Commelina benghalensis* L. {SD 143686} DAYFLOWER

CYPERACEAE – Sedge Family

- Bolboschoenus glaucus* (Lam.) S.G. Sm. {SD 230309} TUBEROUS BULRUSH
[*Scirpus tuberosus* Desf., misappl., *Schoenoplectus glaucus* (Lam.) Kartesz]
Bolboschoenus maritimus (L.) Palla subsp. *paludosus* (A. Nelson) T. Koyama {SD 83641} PRAIRIE BULRUSH
[*Scirpus maritimus* L.] Note: All San Diego Co. specimens were previously incorrectly identified as *S. robustus* Pursh (J. Gibson, personal communication).

NARROW-LEAF CATTAIL

Typha domingensis Pers. {SD 118575}

SOUTHERN CATTAIL

Typha latifolia L. {SD 122815}

BROAD-LEAF CATTAIL

ZANNICHELLIACEAE – Horned-Pondweed Family

[=Potamogetonaceae s.l., sensu APG III]

Zannichellia palustris L. {SD 106643}

HORNED-PONDWEED

ZOSTERACEAE – Eel-Grass Family

Phyllospadix scouleri Hook. {SD 30009}

SCOULER'S SURF-GRASS

Phyllospadix torreyi S. Watson {SD 112179}

TORREY'S SURF-GRASS

Zostera marina L. {SD 117840}

COMMON EEL-GRASS

Zostera pacifica S. Watson {POM 184727}

PACIFIC EEL-GRASS

Note: Possibly indistinct from *Z. marina* morphologically but may represent a cryptic species based on molecular data (Coyer et al. 2008).

APPENDIX 1

TAXA REPORTED FOR SAN DIEGO COUNTY BUT EXCLUDED

(? = probable misidentification)

LEPTOSPORANGIATE FERNS

THELYPTERIDACEAE – Thelypteris Family

*†? *Thelypteris acuminata* (Houtt.) Morton ACUMINATE WOOD FERN

PTERIDACEAE – Brake Family

Pellaea breweri D. Eaton BREWER'S CLIFF-BRAKE

ANGIOSPERMS: EUDICOTS

AIZOACEAE – Fig-Marigold Family

*† *Drosanthemum hispidum* (L.) Schwantes HAIRY DEWFLOWER

AMARANTHACEAE – Amaranth Family [incl. Chenopodiaceae]

*† *Alternanthera caracasana* Kunth MEXICAN ALTERNANTHERA

* *Amaranthus tuberculatus* (Moq.) J.D. Sauer var. *rudis* (J.D. Sauer) Costea & Tar-
dif [A. *rudis* J.D. Sauer] WESTERN WATER-HEMP

APIACEAE (UMBELLIFERAE) – Carrot Family

? *Ammoselinum giganteum* J.M. Coult. & Rose BISNAGA, DESERT SAND-PARSLEY
2B.3 SH G2G3

APOCYNACEAE – Dogbane Family [incl. Asclepiadaceae]

*† *Vinca minor* L. COMMON PERIWINKLE

ASTERACEAE (COMPOSITAE) – Sunflower Family

*† *Achillea filipendulina* Lam. CORONATION GOLD

* *Arctotis venusta* Norl. BLUE-EYED AFRICAN DAISY

[A. *stoechadifolia* P.J. Bergius, misappl.; A. s. var. *grandis* (Thunb.) Less.]

Artemisia tridentata Nutt. subsp. *parishii* (A. Gray) H.M. Hall & Clem.
PARISH'S SAGEBRUSH

Artemisia tridentata Nutt. subsp. *vaseyana* (Rydb.) Beetle MOUNTAIN SAGEBRUSH

* *Carthamus creticus* L. SMOOTH DISTAFF-THISTLE

[*Carthamus baeticus* (Boiss. & Reut.) Nyman]

* *Centaurea cyanus* L. BACHELOR'S BUTTON, CORNFLOWER

*† *Centaurea nigrescens* Willd. TYROL KNAWEED

? *Cirsium brevistylum* Cronq. INDIAN THISTLE

? *Eriophyllum ambiguum* (A. Gray) A. Gray var. *ambiguum*
ANNUAL WOOLLY SUNFLOWER

*† *Lactuca sativa* L. WILD LETTUCE

Malacothrix incana (Nutt.) Torr. & A. Gray DUNEDELION, DUNE MALACOTHRIX
4.3 S3.3 G3

Microseris douglasii (DC.) Schultz-Bip. subsp. *douglasii* DOUGLAS'S MICROSERIS

?*Stylocline citroleum* Morefield

OIL NESTSTRAW

Note: Paratype from San Diego County cited in Morefield 1992, but this apparently misidentified.

BASELLACEAE – Basella Family****Anredera cordifolia* (Ten.) Steenis {SD 115441}**

MIGNONETTE VINE

[*Boussingaultia gracilis* Miers var. *pseudo-baselloides* L.H. Bailey]

Note: Specimens cited appear to be from cultivation; none naturalized have been documented.

BIGNONIACEAE – Bignonia Family****Catalpa bignonioides* Walt.**

SOUTHERN CATALPA

BORAGINACEAE – Borage Family**?*Cryptantha muricata* (Hook. & Arn.) A. Nelson & J.F. Macbr. var. *muricata***

{SD 129725} Note: Single collection likely a large-flowered *C. m.* var. *jonesii* (A. Gray) I.M. Johnst.; specimen fungus-infected, aberrant. PRICKLY CRYPTANTHA

***Cynoglossum grande* Lehm. {SD 4165}**

PACIFIC HOUND'S TONGUE

Note: Known from only 1 specimen at Mountain Springs Grade, out of range and typical habitat. Specimen locality suspect.

***Greeneocharis similis* (K. Mathew & P.H. Raven) Hasenstab & M.G. Simpson**

{UC 507854} [*Cryptantha similis* K. Mathew & P.H. Raven]

Note: Known from 1 specimen at Mountain Springs Grade and out of range. Specimen locality suspect.

CUSHION GREENEOCHARIS

***Nemophila rotata* Eastw.**

EASTWOOD'S BABY BLUE EYES

Note: Possible synonym of *N. menziesii* Hook. & Arn. var. *integrifolia* Parish.

***Phacelia ixodes* Kellogg**

COSTA BAJA PHACELIA

Note: Occurs only in Baja California, Mexico, not in California.

***Plagiobothrys leptocladus* (Greene) I.M. Johnst.**

ALKALI PLAGIOBOTHRYS

***Plagiobothrys scriptus* (Greene) I.M. Johnst. {SD 188578}**

SCRIBE POPCORNFLOWER

Note: What has been identified as *P. scriptus* in our County appears to be a new, unnamed species (R.B. Kelley, personal communication).

***†?*Wigandia caracasana* Kunth**

WIGANDIA

[*W. c.* var. *macrophylla* Brand., *W. urens* (Ruiz & Pav.) Kunth var. *c.* (Kunth) D. Gibson]

BRASSICACEAE (CRUCIFERAE) – Mustard Family***Athysanus unilateralis* (M.E. Jones) Jeps.**

LADIES' TONGUE MUSTARD

[*Heterodraba unilateralis* (M.E. Jones) Greene]

***Descurainia longipedicellata* (E. Fourn.) O.E. Schulz**

TANSY-MUSTARD

{UTC 00087128} [*Descurainia incisa* (Engelm.) Britton subsp. *filipes* (A. Gray)

Rollins] Note: Probably mis-identified; quite out of range.

***Erysimum insulare* Greene subsp. *suffrutescens* (Abrams) R.A. Price**

[*E. suffrutescens* (Abrams) Rossbach] **1B.3 S2.3 G3** SUFFRUTESCENT WALLFLOWER

†*Rorippa intermedia* (Kuntze) Stuckey

TALL YELLOW-CRESS

?*Rorippa sinuata* (Torr. & A. Gray) A. Hitchc.

SPREADING YELLOW-CRESS

CACTACEAE – Cactus Family

Cylindropuntia acanthocarpa (Engelm. & J.M. Bigelow) F.M. Knuth var. *coloradensis* (L.D. Benson) Pinkava {SD 16904} BUCKHORN CHOLLA

[*Opuntia* a. Engelm. & J.M. Bigelow var. *coloradensis* L.D. Benson] Note: An historic specimen resembling this species is now determined as *C. ganderi*.

Echinocereus mojavensis (Engelm. & J.M. Bigelow) Rümpler

MOUND/CLARET-CUP CACTUS

[*Echinocereus triglochidiatus* Engelm., E. t. var. *mojavensis* (Engelm. & J.M. Bigelow) L.D. Benson]

†*Opuntia demissa* Griffiths

Note: This taxon of putative hybrid origin involving *O. oricola*.

CARYOPHYLLACEAE – Pink Family

*?*Spergularia platensis* (Cambess.) Fenzl var. *platensis* LA PLATA SAND-SPURREY

CHENOPODIACEAE – Goosefoot Family

Atriplex serenana Nelson var. *davidsonii* (Standl.) Munz DAVIDSON'S SALT BUSH
1B.2 S1 G5T1

CONVOLVULACEAE – Morning-Glory Family [incl. Cuscutaceae]

Cuscuta occidentalis Millsp. SHORT-FLOWER CHAPARRAL DODDER

[*C. californica* Hook. & Arn. var. *breviflora* Engelm.]

Cuscuta veatchii Brandegee VEATCH'S DODDER

Note: Reported in Jepson II as extirpated in San Diego County.

ERICACEAE – Heath Family

Sarcodes sanguinea Torr. SNOW PLANT

EUPHORBIACEAE – Spurge Family

*?*Euphorbia helioscopia* L. WARTWEED

*†*Euphorbia heterophylla* L. SUMMER POINSETTIA

**Euphorbia myrsinites* L. GOPHER SPURGE

Note: Listed as a waif in the Jepson eFlora.

FABACEAE (LEGUMINOSAE) – Legume Family

**Acacia paradoxa* DC. KANGAROO THORN

[*A. armata* R. Br.] Note: Listed as a waif in Jepson eFlora; cited but not thought naturalized in San Diego Co.

**Acacia verticillata* (L'Her) Willd. STAR ACACIA, PRICKLY MOSES

Note: Listed as a waif in Jepson eFlora; cited but not thought naturalized in San Diego Co.

Acmispon heermannii (Durand & Hilg.) Brouillet var. *orbicularis* (A. Gray)

Brouillet WOOLLY LOTUS

[*Lotus* h. (Durand & Hilg.) Greene var. o. (A. Gray) Isely]

Lupinus adsurgens Drew DREW'S SILKY LUPINE

Sesbania herbacea (Mill.) McVaugh COFFEE WEED, COLORADO RIVER HEMP

[*S. exaltata* (Raf.) Cory]

?*Trifolium macraei* Hook. & Arn. CHILE CLOVER

FAGACEAE – Oak Family

- †*Quercus* ~~*xgrandidentata*~~ Ewan LARGE-LEAF OAK
 [Q. *durata* var. *gabrielensis* x Q. *engelmannii*] Note: This named hybrid was previously misapplied to Q. *dumosa* x Q. *engelmannii*; see Roberts 1995.

GERANIACEAE – Geranium Family

- **Geranium molle* L. DOVE-FOOT GERANIUM
 *†*Geranium retrorsum* DC. TRAVELING GERANIUM
 **Pelargonium zonale* (L.) L'Hér. ZONAL GERANIUM

GROSSULARIACEAE – Gooseberry Family

- ?*Ribes cereum* Douglas var. *cereum* WAX CURRANT

LAMIACEAE (LABIATAE) – Mint Family

- *†*Lavandula stoechas* L. SPANISH LAVENDER
 *†*Leonotis leonurus* (L.) R. Br. LION'S EAR
 ?*Monardella hypoleuca* A. Gray subsp. *hypoleuca* WHITE-LEAF MONARDELLA
 Note: Not in our County; specimens identified as this subspecies recently described as subsp. *intermedia* by M. Elvin and A. Sanders.
 †*Salvia xbernardina* Greene SAN BERNARDINO SAGE
 [S. *columbariae* x S. *mellifera*]
Salvia dorrii (Kellogg) Abrams var. *pilosa* (A. Gray) Strachan & Reveal
 {UC 507848} HAIRY SAGE
 Note: Known from only 1 specimen at Mountain Springs Grade, out of range and typical habitat. Specimen locality suspect.
Stachys albens A. Gray WHITE HEDGE-NETTLE
Trichostema micranthum A. Gray SMALL-FLOWER BLUECURLS

LOASACEAE – Loasa Family

- Mentzelia laevicaulis* (Hook.) Torr. & A. Gray SMOOTH-STEM BLAZING STAR
 {UC 507835} Note: Known from only 1 specimen at Mountain Springs Grade, out of range. Specimen locality suspect.
Mentzelia longiloba J. Darl. YERBA AMARILLA
 [M. *multiflora* (Nutt.) A. Gary subsp. *longiloba* (J. Darl.) Felger]
Mentzelia nitens Greene VENUS BLAZING STAR

LYTHRACEAE – Loosestrife Family

- Rotala ramosior* (L.) Koehne LOWLAND ROTALA
 Note: S.C. McMillan, personal communication; no specimen cited.

MALVACEAE – Mallow Family

- **Modiola caroliniana* (L.) G. Don WHEEL MALLOW

ONAGRACEAE – Evening-Primrose Family

- Camissonia pusilla* P.H. Raven LITTLE WIRY SUN CUP
Camissoniopsis pallida (Abrams) W.L. Wagner & Hoch subsp. *hallii* (Davidson)
 W.L. Wagner & Hoch HALL'S SUN CUP
 [Camissonia p. (Abrams) P.H. Raven subsp. h. (Davidson) P.H. Raven]

- Chylismia claviformis* (Torr. & Frém.) A. Heller subsp. *yumae* (P.H. Raven) W.L. Wagner & Hoch YUMA EVENING-PRIMROSE
 [Camissonia c. (Torr. & Frém.) P.H. Raven subsp. y. (P.H. Raven) P.H. Raven]
Eremothera boothii (Douglas) W.L. Wagner & Hoch subsp. *desertorum* (Munz) W.L. Wagner & Hoch {RSA 465996} DESERT SUN CUP
 [Camissonia b. (Douglas) Raven subsp. d. (Munz) Raven] Note: Previously cited San Diego Co. specimen without fruits, not identifiable to subspecies.
Gayophytum racemosum Torr. & A. Gray GROUNDSMOKE
Oenothera caespitosa Nutt. subsp. *marginata* (Hook. & Arn.) Munz
 [O. c. var. m. (Hook. & Arn.) Munz] FRAGRANT EVENING-PRIMROSE

OROBANCHACEAE – Broom-Rape Family

- Castilleja lasiorhyncha* (A. Gray) T.I. Chuang & Heckard **1B.2 S2.2 G2**
 [Orthocarpus l. A. Gray] SAN BERNARDINO MOUNTAIN OWL'S-CLOVER
 ?*Chloropyron maritimum* (Benth.) A. Heller subsp. *canescens* (A. Gray) Tank & J.M. Egger ALKALI BIRD'S BEAK
 [Cordylanthus m. Benth. subsp. c. (A. Gray) T.I. Chuang & Heckard]
 **Parentucellia viscosa* (L.) Caruel YELLOW GLAND WEED

PHRYMACEAE – Hopseed Family

- Diplacus johnstonii* (A.L. Grant) G.L. Nesom JOHNSTON'S MONKEY FLOWER
 [Mimulus j. A.L. Grant] **4.3 S3.3 G3**

PLANTAGINACEAE – Plantain Family

- **Linaria vulgaris* Mill. BUTTER-AND-EGGS
Plantago subnuda Pilg. TALL COASTAL PLANTAIN
 [P. hirtella Kunth var. galeottiana (Decne.) Thorne]

POLEMONIACEAE – Phlox Family

- Aliciella micromeria* (A. Gray) J.M. Porter DAINY GILIA
 [Gilia micromeria A. Gray]
Leptosiphon floribundus (A. Gray) J.M. Porter & L.A. Johnson subsp. *hallii* (Jeps.) J.M. Porter & L.A. Johnson SANTA ROSA MOUNTAIN LINANTHUS
 [Linanthus f. (A. Gray) Milliken subsp. hallii (Jeps.) H. Mason] **1B.3 S1 G4T1**

POLYGONACEAE – Buckwheat Family

- ?*Chorizanthe parryi* S. Watson var. *fernandina* (S. Watson) Jeps. SAN FERNANDO SPINEFLOWER
 ?*Eriogonum wrightii* Benth. var. *trachygonum* (Benth.) Jeps. WRIGHT'S BUCKWHEAT
 [E. w. subsp. t. (Benth.) S. Stokes]
 *?*Persicaria pensylvanica* (L.) M. Gómez PINKWEED
 [Polygonum pensylvanicum L.]

RHAMNACEAE – Buckthorn Family

- Ceanothus integerrimus* Hook. & Arn. DEER BRUSH
 Note: Vouchers cited are presumed mis-identified.

ROSACEAE – Rose Family*Horkelia rydbergii* Elmer

RYDBERG'S HORKELIA

Potentilla rivalis Nutt.

DIFFUSE CINQUEFOIL

[P. r. var. millegrana (Lehm.) S. Watson]

RUTACEAE – Rue Family**Ruta chalepensis* L.

FRINGE RUE

SALICACEAE – Willow Family†*Populus xparryi* Sarg.

PARRY'S COTTONWOOD

[P. fremontii x P. trichocarpa]

SAXIFRAGACEAE – Saxifrage Family*?Heuchera abramsii* Rydb.

ABRAMS'S ALUMROOT

Note: Vouchers cited are presumed mis-identified.

?Lithophragma cymbalaria Torr. & A. Gray

MISSION STAR

Note: Vouchers cited are presumed mis-identified.

?Lithophragma tenellum Nutt.

SLENDER WOODLAND STAR

Note: Vouchers cited are presumed mis-identified.

SOLANACEAE – Nightshade Family**Physalis lancifolia* Nees

NARROW-LEAF TOMATILLO

[P. angulata L. var. lancifolia (Nees) Waterf.]

VERBENACEAE – Vervain Family*Verbena gooddingii* Briq.

SOUTHWESTERN MOCK VERVAIN

[Glandularia g. (Briq.) Solbrig.]

VIOLACEAE – Violet Family*Viola pupurea* Kellogg subsp. *aurea* (Kellogg) J.C. Clausen[V. aurea Kellogg] **2.2 S2S3 G5T2T3**

MOJAVE GOLDEN VIOLET

ALLIACEAE – Onion Family*Allium lacunosum* S. Watson var. *lacunosum*

PITTED ONION

*†*Nothoscordum bivalve* (L.) Britton

FALSE GARLIC

AMARYLLIDACEAE – Amaryllis Family*†*Narcissus papyraceus* Ker-Gawl. subsp. *papyraceus*

PAPERWHITE NARCISSUS

COMMELINACEAE – Spiderwort Family**Tradescantia fluminensis* Vell.

SMALL-LEAF SPIDERWORT

CYPERACEAE – Sedge Family*?Carex douglasii* Boott

DOUGLAS'S SEDGE

Carex pellita Willd.

WOOLLY SEDGE

[Carex lanuginosa Michx., misappl.]

Carex nebrascensis Dewey

NEBRASKA SEDGE

*†*Cyperus papyrus* L.

EGYPTIAN PAPYRUS

*?*Fimbristylis vahlii* (Lambert) Link

VAHL'S FIMBRISTYLIS

JUNCACEAE – Rush Family

- Juncus exiguus* (Fernald & Wiegand) Snogerup & Zika LAMP RUSH
 [Juncus effusus L. var. exiguus Fernald & Wiegand; plants in our county previously recognized as this taxon now recognized as J. effusus var. austrocalifornicus.]
Juncus tenuis Willd. POVERTY/PATH RUSH

LILIACEAE – Lily Family

- Calochortus amabilis* Purdy DIOGENES'S LANTERN
Calochortus catalinae S. Watson CATALINA MARIPOSA LILY
 4.2 S3.2 G3

ORCHIDACEAE – Orchid Family

- ?*Piperia elegans* (Lindl.) Rydb. ELEGANT HABENARIA
 [Habenaria e. (Lindl.) Bol.] Note: All SD specimens annotated as P. transversa.
Platanthera sparsiflora (S. Watson) Schltr. SPARSE-FLOWER BOG-ORCHID
 [Habenaria s. S. Watson var. s.]

POACEAE (GRAMINEAE) – Grass Family

- **Ammophila arenaria* (L.) Link EUROPEAN BEACH GRASS
Aristida divaricata Willd. POVERTY THREE-AWN
 **Aristida oligantha* Michx. OLDFIELD THREE-AWN
 †*Aristida schiedeana* Trin. & Rupr. ORCUTT'S THREE-AWN
 [Aristida orcuttiana Vasey, A. schiedeana var. orcuttiana (Vasey) Allred & Valdés-Reyna] Note: Reported from San Diego in Jepson II under A. divaricata description and believed to be extirpated.
Bromus ciliatus L. FRINGED BROME
 **Digitaria ischaemum* (Schreb.) Muhl. SMOOTH CRAB GRASS
Poa wheeleri Vasey WHEELER'S BLUE GRASS
 [P. nervosa (Hook.) Vasey var. w.]
 **Puccinellia distans* (Jacq.) Parl. EUROPEAN ALKALI GRASS
 **Schizachyrium cirratum* (Hack) Woot. & Standl. TEXAS BLUESTEM
 **Setaria verticillata* (L.) P. Beauv. HOOKED BRISTLE GRASS
 [S. carnei A. Hitchc., misappl.]
 *†*Zea mays* L. CORN

THEMIDACEAE – Brodiaea Family

- ?*Brodiaea coronaria* (Salisbury) Engler CROWN BRODIAEA
 Note: Cited specimens appear to be mis-identified.
 ?*Brodiaea jolonensis* Eastw. MESA BRODIAEA
 Note: All San Diego County specimens previously identified as B. jolonensis appear to be B. terrestris spp. kernensis; pers. comm. T. Chester and W. Armstrong.
Calochortus venustus Benth. {UC 507783} SQUARE MARIPOSA LILY
 Note: Known from only 1 specimen at Mountain Springs Grade, out of range and typical habitat. Specimen locality suspect.
Dichelostemma multiflorum (Benth.) A. Heller WILD HYACINTH

HISTORICAL COLLECTIONS NOT DOCUMENTED IN LAST 50 YEARS

Name followed by {specimen documentation} + last year of collection + (number of vouchers collected in County). Taxa in chronological order by last collection year.

<i>Sphenopholis obtusata</i> {UC 120918} 1875 (1)	Poaceae
<i>Corallorhiza striata</i> {SD 7902} 1875 (1)	Orchidaceae
* <i>Peritoma serrulata</i> {UC 85558} 1883 (1)	Cleomaceae
<i>Ludwigia palustris</i> (L.) Elliott {UC 140537} 1884 (1)	Onagraceae
<i>Cyperus esculentus</i> var. <i>macrostachyus</i> {US 31874} 1885 (1)	Cyperaceae
<i>Juncus longistylis</i> {RSA 264608} 1889 (1)	Juncaceae
<i>Portulaca halimoides</i> {UC 452682} 1891 (1)	Portulacaceae
<i>Scutellaria siphocampyloides</i> {UC 25789} 1891 (2)	Lamiaceae
* <i>Coriandrum sativum</i> {SD 36335} 1894 (1)	Apiaceae
<i>Arnica cordifolia</i> {UC 91044} 1898 (1)	Asteraceae
<i>Glyceria elata</i> {UC 120647} 1898 (1)	Poaceae
<i>Meconella californica</i> {SD 13490} 1898 (1)	Papaveraceae
<i>Astragalus sabulonum</i> {POM 1659} 1902 (6)	Fabaceae
<i>Cryptantha oxygona</i> {UC 56847} 1902 (1)	Boraginaceae
<i>Leptosyne bigelovii</i> {UC 486380} 1902 (1)	Asteraceae
<i>Aristida divaricata</i> {GH 341044} 1903 (2)	Poaceae
<i>Eriogonum</i> aff. <i>contiguum</i> {SD 22540} 1903 (1)	Polygonaceae
<i>Gayophytum heterozygum</i> {UC 66550} 1904 (1)	Onagraceae
<i>Trifolium fucatum</i> {UC 80505} 1905 (1)	Fabaceae
<i>Phacelia ivesiana</i> {UC 131510} 1906 (2)	Boraginaceae
<i>Perideridia gairdneri</i> subsp. <i>gairdneri</i> {UC 173175} 1910 (1)	Apiaceae
* <i>Geranium aequale</i> {UC 162525} 1911 (1)	Geraniaceae
* <i>Erodium cygnorum</i> {POM 47368} 1917 (1)	Geraniaceae
<i>Descurainia incana</i> {JEPS 53426} 1920 (1)	Brassicaceae
<i>Tetrapteron palmeri</i> {CAS 46043} 1920 (1)	Onagraceae
* <i>Vaccaria hispanica</i> {SD 1611} 1920 (5)	Caryophyllaceae
<i>Carex hassei</i> {RSA 88741} 1924 (2)	Cyperaceae
<i>Sagina saginoides</i> (L.) Karsten {POM 48993} 1924 (1)	Caryophyllaceae
<i>Triphysaria eriantha</i> {SD 4759} 1924 (2)	Orobanchaceae
<i>Viola nephrophylla</i> {SD 16428} 1925 (6)	Violaceae
<i>Potentilla biennis</i> {SD 2228} 1926 (1)	Rosaceae
<i>Salvia pachyphylla</i> subsp. <i>pachyphylla</i> {SD 4296} 1926 (5)	Lamiaceae
<i>Euphorbia parishii</i> Greene {CAS 179830} 1928 (1)	Euphorbiaceae
<i>Wislizenia refracta</i> subsp. <i>palmeri</i> {POM 153427} 1928 (1)	Cleomaceae
<i>Astragalus pachypus</i> var. <i>jaegeri</i> {UC 55962} 1929 (2)	Fabaceae
<i>Gilia sinuata</i> {RSA 469642} 1929 (3)	Polemoniaceae
<i>Erigeron philadelphicus</i> var. <i>philadelphicus</i> {SD 5439} 1929 (1)	Asteraceae
† <i>Sesuvium portulacastrum</i> {SD 5675} 1929 (2)	Aizoaceae
* <i>Galium tricornutum</i> {SD 4922} 1930 (1)	Rubiaceae
<i>Eriogonum angulosum</i> {SD 22405} 1931 (3)	Polygonaceae
* <i>Mentha pulegium</i> L. {RSA 409930} 1931 (4)	Lamiaceae
<i>Pseudognaphalium thermale</i> {UC 650468} 1931 (4)	Asteraceae
<i>Stephanomeria virgata</i> subsp. <i>virgata</i> {UC 676951} 1932 (3)	Asteraceae

<i>Galium johnstonii</i> {DS 212297} 1932 (3)	Rubiaceae
<i>Lepidium dictyotum</i> {UC 494507} 1932 (7)	Brassicaceae
<i>Plagiobothrys stipitatus</i> var. <i>micranthus</i> {SD 39255} 1932 (2)	Boraginaceae
<i>Carex abrupta</i> {RSA 364720} 1932 (1)	Cyperaceae
<i>Juncus breweri</i> {RSA 368248} 1932 (1)	Juncaceae
<i>Xylorhiza tortifolia</i> (Torr. & A. Gray) Greene var. <i>tortifolia</i> {UC 486382} 1932 (2)	Asteraceae
<i>Zostera pacifica</i> {POM 184727} 1932 (1)	Zosteraceae
<i>Amsinckia douglasiana</i> {RSA 499904} 1933 (11)	Boraginaceae
<i>Astragalus aridus</i> {RSA 611932} 1933 (10)	Fabaceae
<i>Acmispon argyraeus</i> var. <i>argyraeus</i> {DS 153646} 1934 (3)	Fabaceae
* <i>Mentzelia lindleyi</i> {SD 38191} 1934 (2)	Loasaceae
<i>Lycium torreyi</i> {UCR 136961} 1937 (4)	Solanaceae
<i>Nemacaulis denudata</i> var. <i>gracilis</i> {SD 1210} 1937 (16)	Polygonaceae
<i>Ranunculus canus</i> var. <i>ludovicianus</i> {POM 88464} 1940 (2)	Ranunculaceae
<i>Astragalus nutans</i> {RSA 605949} 1941 (1)	Fabaceae
<i>Polystichum munitum</i> {DES 00001099} 1944 (1)	Dryopteridaceae
* <i>Myriophyllum aquaticum</i> {UC 1191972} 1948 (1)	Haloragaceae
<i>Cucurbita digitata</i> {RSA 97166} 1955 (1; duplicate at UC)	Cucurbitaceae
<i>Leptosiphon floribundus</i> subsp. <i>hallii</i> {SD 14491} 1955 (3)	Polemoniaceae
<i>Leptosyne douglasii</i> DC. {UCR 23835} 1955 (7)	Asteraceae
<i>Cornus sericea</i> subsp. <i>sericea</i> {SD 12443} 1957 (9)	Cornaceae
<i>Nasturtium gambelii</i> {RSA 668214} 1957 (1)	Brassicaceae
